

Innovations on Fully Integrated appliances

Discover the highlights of our new
fully integrated appliances for 2022.

LIEBHERR

Refrigeration and freezing

IXRF 5185
SIFNe 5188 △ Peak Series
IRBd 5190 △ Peak Series

Timeless freshness.

Liebherr is synonymous with freshness. We are underscoring this again with our Fully Integrated appliances for 2022. Our freshness safes make it possible for time to appear to stand still. That means: The quality of the foodstuffs and all vitamins are completely retained for longer. Everything tastes as authentic and fresh as when it was first stored in the appliance.

With immediate effect, in addition to our refrigerators our freezers will also be fitted with the latest freshness technology. This means that your customers will now have the option of combining the complete range of our 2022 fully integrated appliances according to their requirements. This means an even greater degree of individualisation in kitchen design.

You can find other innovations, e.g. the Fish & Seafood safe or the new AutoDoor function, on the following pages. We hope that there is plenty to impress not only you, but also your customers.

Taste that stands the test of time: Freshness is a question of technology.

We know that your customers appreciate the highest quality and freshness when it comes to choosing groceries.

They take their time while shopping, sniff the herbs and check that the avocados on sale are just ripe. Or they even grow their own food in their gardens or greenhouses and invest time and energy into ensuring that lettuce, strawberries and romanescos reach the plate as fresh as possible. We understand this dedication. And that's why we see it as our task to retain this freshness. Our appliances make this possible – thanks to the perfect combination of integrated freshness technologies.

SIBa 3950 © Prime Series

Even the smallest detail deserves the greatest attention.

We prioritise uncompromising quality – right down to the smallest screw – from the very beginning.

We have been manufacturing high-quality refrigerators and freezers and selling them worldwide since 1954. But at heart, we are still very much a family company with its roots in Germany. It is here that we continue to develop all our products just as before. German engineering – out of loyalty to our founder and with the knowledge built up by generations of engineers.

SIFNe(i) 5188 Δ Peak Series

Convenience for everybody.

Our new Fully Integrated appliances are available in different series: Pure, Plus, Prime and Peak. But regardless of which series you opt for, every single Liebherr comes with the uncompromising Liebherr quality. This is because even in the Pure series, every appliance comes with a wide range of features. For example, the automatic defrosting function NoFrost. Or the DuoCooling feature. This feature ensures that no air is exchanged between the fridge and freezer compartment thanks to two separate refrigerant circuits. The groceries stored do not dry out and no odours are transferred.

Built to last.

You can experience our quality standards in the smallest of details. For example, before a door hinge is approved by us, it must pass through at least 100,000 opening cycles. This corresponds to a usage period of more than 15 years. We also test all other functional parts to ensure that they can last just as long. We also pay meticulous attention to sustainability in the manufacturing of our appliances. We work 100% CFC-free and ensure that any excess plastic that occurs in production is consistently reused and only work with materials that can be recycled when the appliance has reached the end of its service life. After all, we want to keep our planet running for as long as possible and not just our appliances.

We don't just say it. We also guarantee it.

During manufacturing we inspect all components of our refrigerators with great care and test them far more rigorously than required by law – and do this for the last time shortly before they are packaged. It is only then that our appliances can relax a little. All of our manufacturing sites are certified in accordance with the international standards for quality ISO 9001 and environmental management ISO 14001. Nothing could therefore be easier for us than to guarantee for at least two years that our products are free of material and manufacturing faults and are particularly easy to install.

And last, but not least, our gift to you: our 10-year compressor guarantee is free if you register within the first year.

One thing is certain in any case: Your customers will be able to enjoy their Liebherr for a very long time.

Perfectly balanced: a powerful, complete package.

Our fridges are real all-rounders. Besides low power consumption, they also have impressively low noise levels, plenty of space for groceries, a long service life and enough power in reserve for when it really counts. We take account of a great many factors during the development stage and can offer a perfectly balanced appliance. Or to put it another way: all good things come in fours.

Energy consumption

Our new fully integrated appliances take the top places in the efficiency rankings, with appliances even in the top categories B and A. This means you conserve the valuable resources of our environment and also save money thanks to lower electricity costs.

Cooling volume

We have the perfect appliance for all family sizes, lifestyles and niche heights. We make sure that we do not waste a single litre of capacity in the extra-large drawers – right down to the smallest detail, for example with the lighting solutions that have been integrated in the housing to save space.

Noise level

The boundaries between the kitchen and living areas are becoming more blurred in modern households. This underlines the importance of particularly quiet fridges. Our new fully integrated range offers a wide selection of extremely quiet appliances. Some appliances even achieve the ultra-quiet noise level of 29 dB.

Cooling performance

Intelligent sensor technology constantly adapts the cooling performance to current use – our fully integrated appliances are very energy-efficient and economical in everyday use. At the same time they also have plenty of power in reserve, for example to cool down or freeze a large quantity of groceries after the weekly shop.

IRBdi 5171 △ Peak Series

IRBPd(i) 5170 Δ Peak Series

Timeless and elegant:
Design for every kitchen.

Our fully integrated appliances not only impress your customers, they also catch the eye of the juries in design competitions.

reddot winner 2021

Hidden behind the kitchen panels, a Liebherr remains undiscovered at first sight and allows the kitchen design to take centre stage. But once opened it's clear: There is something very special hidden behind the door.

Below zero.
Better than the standard:
Our new freezers.

○ Pure ◇ Plus ⬡ Prime △ Peak

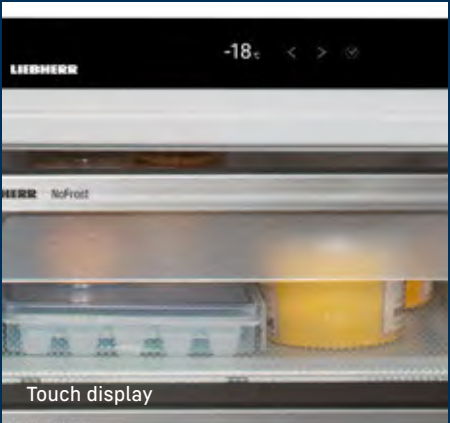

Good news for frozen produce – and you. In 2022 we are expanding our range of Fully Integrated appliances with brand-new freezers. These will be available for all of our appliance series: Pure, Plus, Prime and Peak. We are certain that we will be providing you with another couple of sales arguments for our brand that will impress your customers.

○ Pure Series

The Pure series is our starting class. Plain, clear and perfectly equipped to cover all essential requirements. Appliances in the Pure series are equipped with the essentials. But are to the absolute highest level of Liebherr quality.

Connectivity

Touch display

Freezer tray

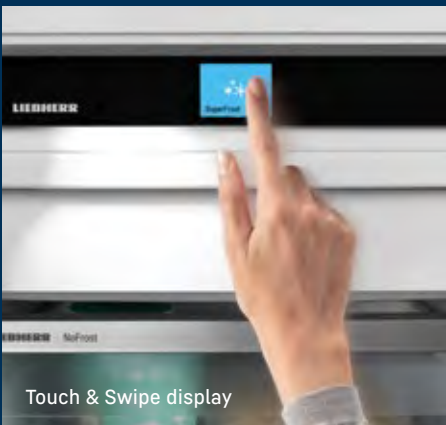

SoftSystem soft stop mechanism

◇ Plus Series

The Plus series builds on our Pure series and has many impressive additional details. Above all, Plus means extra comfort. The appliances not only have a first-class refrigeration and freezing performance. They are also just that little bit smarter and help to make many tasks a little easier.

⬡ Prime Series

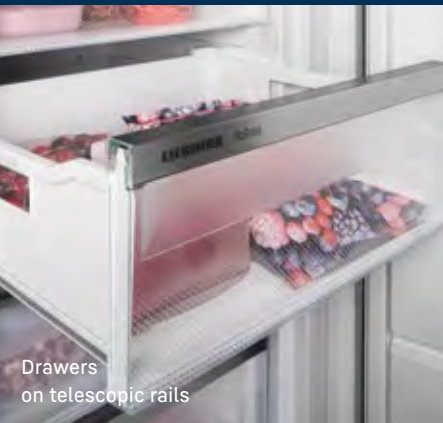

With the Prime series things get much more elegant. Its material and design are unmistakable with its Touch & Swipe display, integrated drawer guides and special lighting solutions

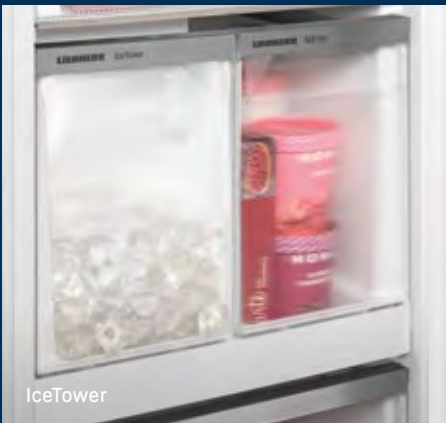

Touch & Swipe display

Lighting

Drawers on telescopic rails

IceTower

△ Peak Series

The Peak series is our premium series. Here the best is combined with the best. There is no compromise. Innovative Liebherr technology meets exceptional high-end design and convenience in a class of their own. Appliances in this series are for those who want to have everything.

The series equipment listed above may vary depending on the model. You can find the exact details in the model description.

Details that won't leave you cold.

Handling and organisation in our freezers is very convenient. The drawers are easily accessible, close quietly and are well illuminated. This means it is even easier to find frozen produce.

Touch & Swipe display
Pressing buttons is a thing of the past. The Touch & Swipe display makes operation very simple and intuitive.

SoftSystem soft stop mechanism
The particularly quiet and soft door closure is integrated into all models from our Plus series upwards.

Lighting
The special lighting solution turns our freezers into genuine eye-catchers. And finding what you're looking for is also easier.

Drawers on telescopic rails
Pleasantly easy opening and closing – even when fully loaded – ensures that all of the groceries are perfectly accessible.

Freezer tray
Fruit, herbs and other sensitive foodstuffs can be individually frozen here for easy portioning.

Our new space-saving miracle

The pull-out IceTower sets new standards.

It combines two large storage options with each other: the automatic IceMaker for up to 5.7 kg of ice cubes and another spacious compartment – large enough to store a couple of family-sized pizzas upright. And so that the customer can still find everything despite the large dimensions, we have also fitted our IceTower with additional lighting.

Ice Tower

One less task for you.

Our AutoDoor feature rounds off the handle-less kitchen perfectly, as the Liebherr appliances open and close automatically in response to a knocking signal, via the SmartDevice app or voice command. This means that the handle and the appliance front stay clean even when your hands are a little sticky.

The first fridges and freezers in the world that open and close in a fully automatic manner. You can select the opening angle and the duration until closing individually. And if need be, you can also open and close it just as easily by hand or with your smartphone.

Available from the 3rd quarter of 2022

Models with AutoDoor Δ Peak Series:

Refrigerator		Freezer	
IRBA ^d 5190	178	SIFNA ^e 5188	178
IRBA ^d 5171	178	Side-by-side combination	
IRDA ^d 4170	122	IXRFA 5175: SIFNA ^e 5188 IRBA ^d 5190	178

Always connected.

All our new Fully Integrated appliances are either already networked in the factory or can be subsequently connected to WiFi via a SmartDeviceBox.

Opening and closing via voice command
(Requires the SmartDevice app and Amazon Alexa or Google Assistant. Availability may differ by country.)

Opening and closing via knocking signal

Opening and closing via smartphone
(Requires the SmartDevice app. Availability may differ by country.)

This way, your customers will benefit from the many possibilities of our SmartDevice app and from connecting all fridges or freezers to an existing smart home environment.

Important status messages, for example about an open fridge door, are sent directly to the smartphone via the door alarm. Our SmartDevice app has much more to offer besides: from clear management of all the appliances to easy remote control from afar. For example, the SuperCool or SuperFrost function can be activated directly from the supermarket.

In short, our appliances prepare people for tomorrow, today.

Find out how digitally networked cooling simplifies everyday life:
home.liebherr.com/getsmart

You can download the SmartDevice app here:

Like freshly caught fish from the market. Our Fish & Seafood safe.

So that fish and seafood taste just as fresh as when on holiday on the Mediterranean coast, you need to find a very good fishmonger back home. And you also need a cooling compartment that retains their freshness, such as our Fish & Seafood safe. Fish and seafood is stored here at -2°C. Perfect conditions to keep that just-caught freshness for considerably longer.

+ 5 days

+ 3 days

+ 3 days

+ 5 days

+ 3 days

+ 3 days

+ 3 days

+ 14 days

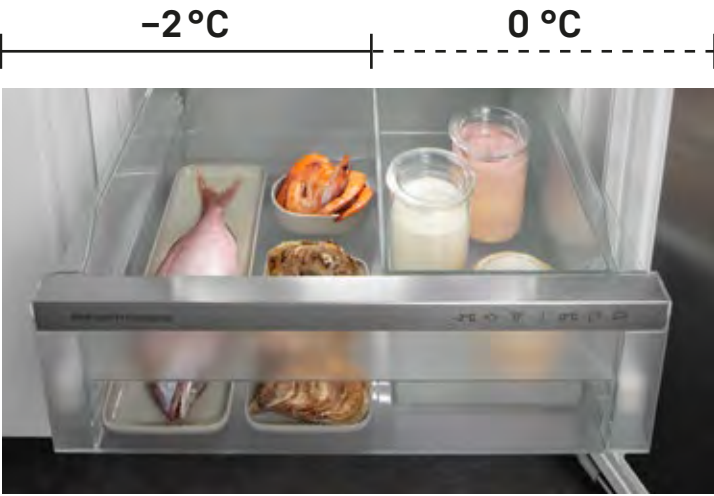

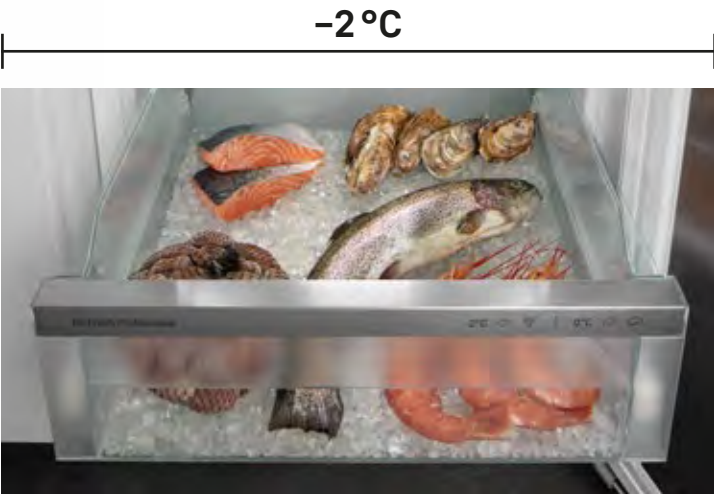

Fish & Seafood

Specifications made in days refer to comparisons with the normal fridge compartment.

Flexible use
The area of the -2 °C-zone can be reduced in three ways depending on the storage requirements and thus also be used to store meat and dairy produce at just over 0 °C.

A fourth option is to use the safe completely for dairy products and meat.

A perfect duo: refrigeration and freezing.

We believe that the only thing better than one Liebherr appliance is two Liebherr appliances – for example, one for refrigerating and one for freezing. Our Side-by-Side solutions mean that they fit perfectly next to each other even as a Fully Integrated combination.

IRBd 5170

Or a trio or quartet?

There are endless possibilities for combining our fridges and freezers – depending on space and requirements.

A service for anybody who has difficulty making up their mind.

Our Side-by-Side solutions mean that the possibilities for combining our appliances are almost endless. For anybody who is almost overwhelmed by such a wide range on offer and make your planning easier we have compiled a sort of “Best-of” from all the possible Side-by-Side combinations.

These living situations shows two possible sets. You can find the complete range starting on page 52.

Space for an
entire field:
full space BioFresh

Especially at harvest time, the customer may need to store a lot of fruit and vegetables at the same time. Our full-space BioFresh refrigerator is ideal for this.

It is also categorised in the highest efficiency class, A.

Freshness is stackable.

Even if they don't look it at first glance, our refrigerators are extremely flexible. The Side-by-Side concept enables them to be freely combined with each other and stacked. A refrigerator, freezer, wine cabinet or full-space BioFresh can be combined with each other to create a wholly individual freshness centre consisting of several individual elements and cooling zones. This gives kitchen designers all of the freedom they need. And your customers have all their appliances in one convenient place.

open the fridge.

○ Pure ◇ Plus ⬡ Prime △ Peak

Which appliance is right for me?
A customer question that is not always
easy to answer. That's why we have made
orientation even more simple for you and
your customers and divided our range into
four clear and logical series. This also
makes it easier to inspire your customers
to select a better-equipped series.

○ Pure Series

The Pure series is our basic class.
Simple, clear and perfectly equipped
for all essential needs. Appliances in
the Pure series are equipped with
the essentials. But are to the absolute
highest level of Liebherr quality.

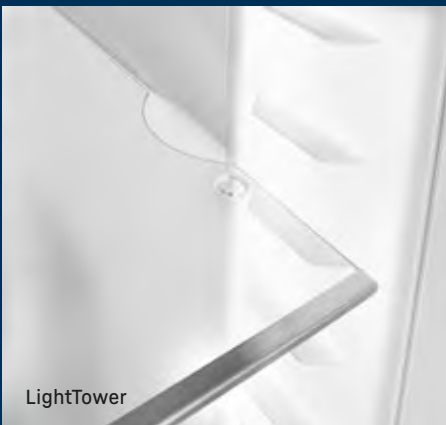

◇ Plus Series

The Plus series builds on our Pure series
and has many impressive additional
details. Above all, Plus means extra
comfort. The appliances not only provide
first-class refrigeration and freezing,
they are also just that little bit smarter.
They help make operation a little easier.

⬡ Prime Series

With the Prime series things get much
more elegant. It makes an unmistakable
mark in terms of design and material.
Above all, top quality materials are
used inside the appliances, such as
stainless steel. But also special lighting
solutions make the appliances in this
series particularly appealing.

△ Peak Series

The Peak series is our premium series.
Here the best is combined with the best.
There is no compromise. Innovative
Liebherr technology meets exceptional
high-end design and convenience in
a class of their own. Appliances in this
series are for those who want to have
it all.
