### Unit Dimensions

- **A.** 2-7/32" (56.5 mm)
- **B.** 71-9/16" (1817 mm)
- **C.** 23-5/8" (600 mm)
- **D.** 25-3/16" (640 mm)
- **E.** 24-3/16" (614 mm)
- **F.** 24-13/16" (630 mm)
- **G.** 46-1/2" (1180 mm)

### Cabinet Opening Dimensions

- The given cabinet opening height dimension includes space for top air vent. If you choose to place the vent above the cabinet or in a soffit, you will need to adjust the height dimensions accordingly. Please refer to Ventilation Requirements.

### Ventilation Requirements

- **Kitchen Cabinet Airflow**
  - The following ventilation dimensions must be observed: There must be a ventilation space at least 31 in² (200 cm²) per appliance at the airflow inlet (1) and at the airflow outlet (2).
  - The top ventilation space can be directed in one of the following ways:
    - A) Directly over the appliance (2) with a gap between the ceiling of the unit and the cabinet.
    - B) Above the cabinet and below the ceiling (3).
    - C) Through a vent installed in a soffit (4).
  - The refrigerator is designed to allow proper airflow when the appliance is installed up against the wall. A minimum space of 1 1/2" (38mm) is required behind any cabinet above the appliance if ventilating above that cabinet.

### Top Door Hinge Clearance

- This type of cabinet must be carefully constructed using the correct dimensions and it must provide suitable ventilation to ensure proper appliance operation.

### Unit Venting

- **DO NOT** restrict the air flow. A cross-sectional air flow of at least 31 square inches (200 cm²) must be provided. The opening can either be directly over the appliance or behind the cabinet on top of the unit (see ventilation requirements).
- The CS models can be installed in standard 24" (609mm) deep cabinets. You will only have to make sure that the door swing clearance is enough. It is possible to push all CS models to the rear wall of the cabinet without modification.
- When installing the appliance next to a wall, a distance on the hinge side of 1 13/32 inches (36 mm) minimum is required between the appliance and the wall to allow for the door handle projection when the door is open.

### Minimum Cabinet Opening Dimensions:

- **A.** 23-7/8" (606 mm)
- **B.** 24" (609 mm)
- **C.** 85-29/32" (2182 mm)
- **D.** 73" (1854)*

The compact refrigerator-freezer combination CS 1210 is the perfect choice for smaller footprint installations like galley kitchens or apartment living. While being the most energy efficient unit in its class, the sleek 24” unit smart interior design features like an LED ceiling light, foldable glass shelf, and a stainless back wall which prevents ice build-up and shipping. Liebherr’s SmartSteel material on the door is scratch resistant and makes fingerprints virtually disappear.

Liebherr’s DuoCooling system for the refrigerator and the freezer provides superior performance and efficiency, as well as advanced food preservation. DuoCooling creates optimal conditions in both the refrigerator and freezer compartments, which lengthens the shelf life of food items for a healthier lifestyle.

**German Engineering:** Our superior products offer premium quality, cutting edge design and innovative features that fit your busy lifestyle. Exclusive components and materials, along with the latest production processes, ensure energy efficiency and performance for years to come.

**Energy Star:** Liebherr refrigerators help produce less energy waste and greenhouse gas emissions with the goal of having the least damaging effect on the environment, while offering solutions that help consumers conserve energy.

**DuoCooling:** The dual refrigeration system creates optimal conditions in both the refrigerator and freezer which lengthens the shelf life of food items for a healthier lifestyle. This technology also preserves the flavor and texture of foods since there is no transfer of unwanted air, moisture or food aroma between the two compartments.

**SuperCool/SuperFrost:** Simply quick chill and/or freeze fresh groceries to preserve optimum freshness and seal in flavors, textures as well as maintain essential vitamins and minerals.

**SuperQuiet:** Noise is kept to a minimum with virtually silent, speed controlled compressors and a low-noise cooling circuit; while also ensuring exact performance, energy efficiency and SuperQuiet operation.

**SmartSteel:** Available on select freestanding/semi built-in models, SmartSteel significantly reduces the visibility of fingerprints and is very easy to clean and scratch resistant. All that is required to maintain this beautiful exterior is the wipe of a clean dry or damp cloth.

**Stainless back wall:** The high-quality, stainless back wall is both eye-catching and highly functional. The stainless wall prevents foods from freezing up against the evaporator, ensuring that the back of the refrigerator is always drip and ice-free. Ventilation slits also help guarantee optimum temperature distribution.

**Electronic Display:** Our intuitive electronic touch control panel ensures all functions are easy and convenient to use as well as guarantees that the settings selected remain accurate and constant.

**GlassLine:** The elegant yet tough GlassLine shelves are scratch resistant and easy to clean as well as dishwasher safe. The space-saving shelves are designed for organization and are completely adjustable to suit your needs and the contents of the refrigerator. Additionally, the lighting shines through for a brighter interior.
