

The Compact Solution for Frozen Goods

Quality, Design and Innovation

G 1213

LIEBHERR

SmartFrost: Compared to other static freezers, SmartFrost technology by Liebherr freezes food faster and reduces ice build-up, making defrosting simpler and quicker. It also provides a more flexible storage area with greater capacity and improved energy consumption for lower running costs.

FrostSafe: With FrostSafe technology, removable drawers in the freezer are closed all round so that the cold cannot dissipate quickly when the freezer is opened.

VarioSpace: VarioSpace provides added flexibility by removing drawers to create extra storage space for large frozen items.

The **G 1213** table top freezer is our compact solution for frozen food storage. This model is suitable for small footprint apartments, storage rooms or in the garage.

Equipped with automatic SuperFrost function to make freezing simple and energy efficient. This technology quickly reduces the temperature to -32°C and thus creates the cold air required to preserve vital vitamins. As soon as the food is completely frozen, the automatic SuperFrost function switches back to normal mode after a maximum of 65 hours and thus assists in saving electricity.
