The manufacturer works constantly on the further development of all the types and models. Therefore please understand that we have to reserve the right to make design, equipment and technical modifications.

To get to know all the benefits of your new appliance, please read the information contained in these instructions carefully.

The instructions apply to several models. Differences may occur. Text relating only to specific appliances is marked with an asterisk (*).

Instructions for action are marked with a ▶, the results of action are marked with a ▸.

* Depending on model and options
The following applications are expressly forbidden:
- Storing and refrigerating medicines, blood plasma, laboratory preparations or similar substances and products based on the Medical Device Directive 2007/47/EC
- Use in areas at risk of explosions
- Use on moving substrates, such as ships, rail travel or aeroplanes
- Storing live animals

Misusing the appliance may lead to damage to the goods stored or they may spoil.

**Climate classifications**

Depending on the climate classification the appliance is designed to operate in restricted ambient temperatures. The climate classification applying to your appliance is printed on the rating plate.

**Note**

Keep to the specified ambient temperatures in order to guarantee that the appliance works properly.

<table>
<thead>
<tr>
<th>Climate classification</th>
<th>for ambient temperatures</th>
</tr>
</thead>
<tbody>
<tr>
<td>SN, N</td>
<td>to 32 °C</td>
</tr>
<tr>
<td>ST</td>
<td>to 38 °C</td>
</tr>
<tr>
<td>T</td>
<td>to 43 °C</td>
</tr>
</tbody>
</table>

The appliance will work properly down to a lower ambient temperature of 5 °C.

**1.3 Conformity**

The refrigerant circuit has been tested for leaks. This appliance complies with the applicable safety stipulations and with directives 2014/35/EU, 2014/30/EU, 2009/125/EG, 2011/65/EU and 2010/30/EU.

**1.4 Product data**

Product data is included with the appliance, as per Directive (EU) 2017/1369. The complete product data sheet is available on the Liebherr website under Downloads.

### General safety information

#### 1.6 Saving energy

- Pay attention to good ventilation. Do not cover ventilation holes or grids.
- Always keep the fan air slits clear.
- Do not install the appliance in direct sunlight, next to an oven, radiator or similar.
- Energy consumption is dependent on the installation conditions, e.g. ambient temperature (see 1.2). If the ambient temperature deviates from the standard temperature of 25°C, the energy consumption may differ.
- Open the appliance for as short a time as possible.
- The lower the temperature is set the higher the energy consumption.
- Keep all food properly packed and covered. This prevents frost from forming.
- Inserting warm food: allow to cool down to room temperature first.

#### 1.7 Smart device

The appliance is ready for integration into a smart home and for extended services. Other options can be selected with a SmartDeviceBox. This is activated via the MyLiebherr customer portal.

You will find more information about availability and pre-requisites and the individual options on the website [www.smartdevice.liebherr.com](http://www.smartdevice.liebherr.com).

### 2 General safety information

#### Danger for the user:

- This device can be used by children and people with impaired physical, sensory or mental abilities or with a lack of experience and knowledge provided that they are supervised or have received instruction in the safe use of this device, and about the resulting hazards. Children must not play with this appliance. Cleaning and user maintenance work must not be carried out by children without adult supervision. Children aged between 3 and 8 are allowed to load and unload the appliance. Children below the age of 3 must be kept away from the appliance unless they are under continuous adult supervision.
- When disconnecting the appliance from the supply, always take hold of the plug. Do not pull the cable.
- In the event of a fault pull out the mains plug or deactivate the fuse.
- Do not damage the mains power cable. Do not operate the appliance with a defective mains power cable.
- Only customer service or other specially trained staff may repair or perform other operations on the appliance.
- Only assemble, connect and dispose of the appliance according to the instructions.
- Please keep these instructions in a safe place and pass them on to any subsequent owners.
- All repairs to and intervention in the IceMaker may be carried out only by service personnel or by other skilled personnel trained for the purpose.*
- The manufacturer is not liable for damage caused by a faulty fixed water connection.*
- Special lights, such as LED lights on the appliance, are used to illuminate the interior of the appliance and are not suitable for room lighting.

#### Fire hazard:

- Refrigerant R 600a is environmentally friendly, but flammable. Leaking refrigerant may ignite.
  - Do not damage the refrigerant circuit pipes.
  - Do not use an open flame or other source of ignition inside the appliance.
  - Do not use electrical appliances inside the appliance (e.g. steam cleaners, heaters, ice cream makers, etc.).
  - If the refrigerant leaks: remove any naked flames or ignition sources from the vicinity of the leakage point. Properly air the room. Inform customer services.
- Do not store explosives or sprays using combustible propellants such as butane, propane, pentane, etc. in the appliance. To identify these spray cans, look for the list of contents printed on the can, or a flame symbol. Gases possibly escaping may ignite due to electrical components.
- Keep burning candles, lamps and other items with naked flames away from the appliance so that they do not set the appliance on fire.
- Please be sure to store alcoholic drinks or other packaging containing alcohol in tightly closed containers.

### Model Dimensions

* If you are using wall spacers, add 15 mm (see 4.2) to the dimensions.

With the door open, the dimensions apply to an opening angle of 115 °. Distances vary according to the opening angle.

* Depending on model and options
closed containers. Any alcohol that leaks out may be ignited by electrical components.

**Danger of tipping and falling:**
- Do not misuse the plinth, drawers, doors etc. as a step or for support. This applies particularly to children.

**Danger of food poisoning:**
- Do not consume food which has been stored too long.

**Danger of frostbite, numbness and pain:**
- Avoid lasting skin contact with cold surfaces or refrigerated/frozen food or take protective steps, e.g. wear gloves. Do not consume ice cream, water ice or ice cubes immediately and do not consume them too cold.

**Danger of injury and damage:**
- Hot steam can lead to injury. Do not use electrical heating or steam cleaning equipment, open flames or defrosting sprays to defrost.
- Do not use sharp implements to remove the ice.

**Danger of crushing:**
- Do not hold the hinge when opening and closing the door. Fingers may get caught.

**Symbols on the appliance:**

The symbol can be located on the compressor. It refers to the oil in the compressor and indicates the following danger: Swallowing or inhaling can be fatal. This is only relevant for recycling. There is no danger in normal operation.

Please observe the specific information in the other sections:

### 3 Controls and displays

#### 3.1 Home screen

![Fig. 3](image)

(1) Freezer compartment field

(2) Menu field

The home screen is the first screen the user sees. All settings can be made from there. All functions can be called up by touching the screen and values can be changed.

#### 3.2 Operating structure

**Freezer compartment field**

![Fig. 4](image)

(1) Freezer compartment symbol

(2) Freezer compartment temperature display

The freezer compartment temperature is displayed in the freezer compartment field. The following settings can be entered:
- Temperature settings
- Switch off appliance. Screen remains functional.

**Menu field**

![Fig. 5](image)

(1) Main menu

(2) Option selected

The menu field gives access to the appliance options and settings. Selected options are also displayed.

#### 3.3 Navigation

Touch the menu to access the individual options. An audible signal sounds after confirming an option or a setting. The display switches to the home screen. The appliance is operated using the following symbols:

- **Standby:**
  Switches the appliance or temperature zone on.

* Depending on model and options
Putting into operation

**MENU**

- **Calls up options.**
- **Changing settings (e.g. adjusting temperatures).**
- **Selects options and navigates through the menu.**
- **You can scroll through the individual options using the navigation arrows.**
  - The first option is displayed again after the last one.
- **Cancels the selection.**
- **The display switches to the next higher level or to the home screen.**
- **Confirms the selection.**
  - After confirmation the display switches to the home screen.
- **Starts/ stops options.**
  - After selecting or cancelling an option the display switches to the home screen.
- **Resets timer.**
  - The symbol disappears if the option ends or is disabled.

**OK**

**ON / OFF, START / STOP**

**RESET**

**Access to customer service**

**Note**

- If no selection is made after 1 minute the display switches to the home screen.

### 3.4 Display symbols

Display symbols provide information on the current appliance status:

- **Up arrows:**
  - The temperature increases.
- **Down arrows:**
  - The temperature reduces.
- **Standby:**
  - The appliance or temperature zone is switched off.
- **Messages:**
  - There are active error messages and reminders.

### 3.5 Appliance options

You can select or set the following options; explanations and setting options, (see 5):

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Option</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>SuperFrost *</td>
</tr>
<tr>
<td></td>
<td>SabbathMode</td>
</tr>
<tr>
<td></td>
<td>IceMaker**/x**</td>
</tr>
<tr>
<td></td>
<td>Child safety device x</td>
</tr>
<tr>
<td></td>
<td>Temperature unit</td>
</tr>
<tr>
<td></td>
<td>Status display**/x**</td>
</tr>
</tbody>
</table>

* If the option is selected, the relevant symbol is displayed in the menu field.

If more than 6 selected options are selected only 4 options are displayed in the menu field. The other options are displayed by pressing the bottom navigation arrow. Pressing the navigation arrow repeatedly takes you back to the home screen.

The symbol disappears if the option ends or is disabled.

### 4 Putting into operation

#### 4.1 Transporting the appliance

**CAUTION**

- Risk of injury and danger of damage as a result of incorrect transport!
  - Transport the appliance in a packed condition.
  - Transport the appliance upright.
  - Do not transport the appliance without assistance.

#### 4.2 Installing the appliance

**WARNING**

- Fire hazard due to dampness!
  - If live parts or the mains lead become damp this may cause short circuits.
  - The appliance is designed for use in enclosed areas. Do not operate the appliance outdoors or in areas where it is exposed to splash water or damp conditions.

**WARNING**

- Risk of fire due to short circuit!
  - If the mains cable/connector of the appliance or of another appliance touch the rear of the appliance, the mains cable/connector may be damaged by the appliance vibrations, leading to a short circuit.
  - Stand the appliance so that it is not touched by connectors or main cables.
  - Do not plug the appliance or any others into sockets located near the rear of the appliance.
**WARNING**

Fire hazard due to refrigerant!
The refrigerant R 600a is environmentally friendly but flammable. Escaping refrigerant may ignite.
► Do not damage the piping of the refrigeration circuit.

**WARNING**

Fire hazard and danger of damage!
► Do not place appliances emitting heat e.g. microwaves, toasters etc. on the appliance!

**WARNING**

Blocked ventilation openings pose a risk of fire and damage!
► Always keep the ventilation openings clear. Always ensure that the appliance is properly ventilated!

**NOTICE**

Risk of damage due to condensate!
If your appliance is not a Side-by-Side (SBS) appliance:
► do not install the appliance directly alongside a further refrigerator/freezer.

- In the event that the appliance is damaged, contact the supplier immediately before connecting to the mains.
- The floor at the site must be flat and level.
- Do not install the appliance in a location where it is exposed to direct radiation of the sun, next to a cooker, heater and similar.
- The ideal installation site is a dry, well ventilated room.
- Always stand the appliance backed directly to the wall using the enclosed wall spacers (see below).
- The appliance may be moved only when it is empty.
- The surface supporting the appliance must be at the same level as the surrounding floor.
- Do not install the appliance without assistance.
- The more refrigerant R 600a there is in the appliance, the larger than room must be in which it is located. In rooms that are too small, a leak can product a flammable gas/air mixture. According to the standard EN 378, per 11 g of refrigerant R 600a, the room where the appliance is installed must be at least 1 m³. The quantity of refrigerant used in your appliance is indicated on the type plate on the inside of the appliance.
- Remove the protective film from the outside of the appliance.*

**NOTICE**

Risk of damage from stainless steel care products!
The stainless steel doors and stainless steel side panels are treated with a premium surface finish.

Stainless steel care products attack these surfaces.
► Only use a soft, clean cloth to wipe down finished door and side panel surfaces and painted door and side panel surfaces. To remove heavy dirt, use a little water or neutral detergent. Alternatively, you can use a micro-fibre cloth.

► Remove the protective film from the decorative trims and drawer fronts.
► Remove all transit supports.

Spacers must be used to achieve the declared energy consumption and to prevent condensation in the event of high surrounding humidity. This increases the appliance depth by about 15 mm. The appliance will work perfectly well without the spacers but will have a slightly higher energy consumption.

If your appliance comes with wall spacers, mount these on the back of the appliance, bottom left and right.

Dispose of packaging material (see 4.6).
► Align the appliance so that it stands firmly and on a level by applying the accompanying spanner to the adjustable-height feet (A) and using a spirit level.

When a Side-by-Side appliance (S…) is fitted together with a second appliance (as a SBS combination):*
► Proceed according to the Side-by-Side combined fridge-freezer installation instructions. (Accessories bag of the SBS freezer/appliance with freezer compartment)*

**Note**
► Clean the appliance (see 6.3).

If the appliance is installed in a very damp environment, condensate may form on the outside of the appliance.
► Always see to good ventilation at the installation site.

### 4.3 Reversing the door

If necessary, you can change the way the door opens:

Ensure that the following tools are available:
- Torx® 25 (T25)
- Torx® 15 (T15)
- Slotted screwdriver
- Open-ended wrench SW10
- Spirit level
- Open-ended wrench supplied with the T25 tool
- If necessary, a cordless screwdriver
- Get a stepladder if necessary
- If necessary, a second person for assembly

For appliances with the soft stop mechanism these sections apply:*  
- For appliances with the soft stop mechanism*
- For all appliances*

For appliances without the soft stop mechanism these sections apply:*  
- For appliances without the soft stop mechanism*
- For all appliances*

* Depending on model and options
NOTICE
Risk of condensation damage for Side-by-Side appliances!* Certain appliances can be set up as Side-by-Side combinations (two appliances next to each other). If your appliance is a Side-by-Side (SBS) appliance: ▶ Set up the SBS combination in accordance with the enclosed document.
If the positioning of the devices is stipulated: ▶ Do not change the door hinges over.

4.3.1 Remove the soft stop mechanism*
For appliances with the soft stop mechanism:

OPEN THE DOOR.

NOTICE
Risk of damage! If the door seal is damaged, the door may fail to close properly and the cooling will be inadequate. ▶ Do not damage the door seal with the screwdriver!

▶ Remove the outer cover. Fig. 6 (1)
▶ Disengage and release the bearing bracket cover. Remove the bearing bracket cover. Fig. 6 (2)
▶ Unlatch the panel with a slotted screwdriver and swivel it to one side. Fig. 6 (3)

CAUTION
Crushing hazard by joint folding up! ▶ Engage safety device.

▶ Engage the locking device in the opening. Fig. 7 (1)
▶ Unscrew the bolt with a screwdriver. Fig. 7 (2)
▶ Remove the bolt in an upward direction. Fig. 7 (3)
▶ Turn the hinge in the direction of the door. Fig. 7 (4)

Fig. 8
▶ Press the tab with the slotted screwdriver. Fig. 8 (1)
▶ Pull cover out of the catch mechanism. Fig. 8 (2)

Fig. 9
▶ Undo the soft stop mechanism screw with a T15 screwdriver approx. 14 mm. Fig. 9 (1)
▶ Insert a screwdriver behind the soft stop mechanism on the handle side and rotate forwards. Fig. 9 (2)
▶ Remove the soft stop mechanism. Fig. 9 (3)

4.3.2 Remove the door
For appliances without a soft top mechanism:*
NOTICE
Risk of damage!
If the door seal is damaged, the door may fail to close properly and the cooling will be inadequate.
► Do not damage the door seal with the screwdriver!

► Remove the outer cover. Fig. 10 (1)
► Disengage and release the bearing bracket cover. Remove the bearing bracket cover. Fig. 10 (2)
► Unlatch the panel with a slotted screwdriver and swivel it to one side. Fig. 10 (3)

For all appliances:

CAUTION
Risk of injury if the door tips!
► Take good hold of the door.
► Set down the door carefully.

► Carefully remove the protective cover. Fig. 11 (1)
► Undo the bolt a little with a T15 screwdriver. Fig. 11 (2)
► Hold the door and remove the bolts with your fingers. Fig. 11 (3)
► Pull the bearing bush out of the guide. Insert from the other side and click into place. Fig. 11 (4)
► Lift the door and set it aside.
► Carefully lift the plugs out of the door bearing bush with a slotted screwdriver and remove. Fig. 11 (5)

4.3.3 Moving the upper bearing parts to the other side

For all appliances:
4.3.4 Moving the lower bearing parts to the other side

For all appliances:

- Release the cover and remove from the side. **Fig. 13 (1)**
- Rotate the cover 180° and clip onto the other side from the right. **Fig. 13 (2)**
- Click the cover into place. **Fig. 13 (3)**
- Position the screw with a T25 screwdriver. **Fig. 13 (4)**
- Place the pins in the provided screw holes.
- Tighten the screw. **Fig. 13 (4)**
- Insert the screw with a T25 screwdriver and tighten. **Fig. 13 (6)**

4.3.5 Moving the door bearing parts to the other side

For appliances without a soft top mechanism:

- Lift the bearing pin completely upward and remove. **Fig. 14 (1)**
- Undo the screws with a T25 screwdriver and remove the bearing bracket. **Fig. 14 (2)**

For all appliances:

- Loosen the screw using a T25 screwdriver. **Fig. 15 (1)**
- Lift the door closure aid and turn it 90° to the right in the hole. **Fig. 15 (2)**
- Tighten the screw using a T25 screwdriver. **Fig. 15 (3)**

Fig. 14

**Fig. 15**

* Depending on model and options
4.3.6 Moving the handles to the other side

For all appliances:*

* Depending on model and options
4.3.7 Fitting the door
For all appliances:

- Position the handle on the other side. Fig. 19 (1)
- The screw holes must be exactly above each other.
- Tighten the screws with the T15 screwdriver. Fig. 19 (2)
- Position the covers on the side and push in. Fig. 19 (3)
- Ensure that it clicks into place.

4.3.8 Aligning the door
For all appliances:

- Place the door on the lower bearing pins.
- Align the top of the door with opening in the bearing bracket. Fig. 20 (1)
- Insert the bolt and tighten with a T15 screwdriver. Fig. 20 (2)
- Fit the protective cover to protect the door: Insert the protective cover and check that it is attached to the door. If not, insert the bolt fully. Fig. 20 (3)
- Insert the plugs. Fig. 20 (4)

4.3.9 Fit the covers*
For appliances without a soft top mechanism:

- Place the door on the lower bearing pins. Fig. 20 (1)
- Align the top of the door with opening in the bearing bracket. Fig. 20 (1)
- Insert the bolt and tighten with a T15 screwdriver. Fig. 20 (2)
- Fit the protective cover to protect the door: Insert the protective cover and check that it is attached to the door. If not, insert the bolt fully. Fig. 20 (3)
- Insert the plugs. Fig. 20 (4)

4.3.10 Fit the soft stop mechanism*
For appliances with the soft stop mechanism:

- Position the bearing bracket and engage. If necessary push apart carefully. Fig. 21 (1)
- Position the panel on the side and click into place. Fig. 21 (2)

> Slide on the external cover. Fig. 22 (1)
> Close the upper door. Fig. 22 (2)

---

**WARNING**
Risk of injury due to the door dropping out!
If the bearing parts are not screwed into place firmly enough, the door may drop out. This may lead to severe injuries. What is more, the door may not close and therefore the appliance may fail to cool properly.
- Align the doors flush with the appliance housing using the two oblong holes in the lower bearing bracket if needed. To do this undo the middle screw in the bottom bearing bracket with the T25 tool supplied. Undo the remaining screws a little with the T25 tool or with a T25 screwdriver and align using the slotted holes.
- Support the door: Take off the adjustable foot on the bearing bracket using the open-ended wrench SW10 until it comes into contact with the floor, then turn an additional 90°.

* Depending on model and options
Slide the soft stop mechanism on the bearing bracket side at an angle into the slot as far as the limit stop. Fig. 23 (1)
Slide the unit in fully.
The unit is positioned correctly when the rib on the soft stop mechanism is in the guide in the housing.
Tighten the screw with the T15 screwdriver. Fig. 23 (2)

The door is open 90°.
Turn the hinge in the bearing bracket. Fig. 24 (1)
Insert the bolt in the bearing bracket and hinge. Make sure that the catch mechanism is sitting correctly in the groove. Fig. 24 (2)
Remove the locking device. Fig. 24 (3)
Slide on the cover. Fig. 24 (4)

Position the bearing bracket and engage. If necessary push apart carefully. Fig. 25 (1)
Position the panel. Fig. 25 (2)
Swing in the panel and click into place. Fig. 25 (3)
Slide on the external cover. Fig. 25 (4)
Close the upper door. Fig. 25 (5)

4.4 Water connection*

WARNING
Danger of electric shock!
Disconnect the appliance by unplugging it before you connect it to the water line.
Shut off the water supply before you connect the water feed lines of the IceMaker.
The connection to the drinking water system may be carried out only by a qualified gas fitter and plumber.

WARNING
Risk of poisoning!
The water quality has to comply with the drinking water ordinance of the respective country (e.g. 98/8)
Connect to the drinking water supply only.
The IceMaker serves exclusively for making ice cubes in household quantities and has to be operated with water suitable for the purpose.

The water pressure must be between 0.15 MPa and 0.6 MPa (1.5 bar - 6 bar).

* Depending on model and options
Water must be supplied to the appliance through a cold water pipe that complies with hygiene standards and can withstand the operating pressure. Use the stainless steel hose supplied (Length 1.5 m) Do not reuse old hoses. A 3 m hose is available as an optional extra. This must be professionally installed. A filter with a seal is located in the hose connector. A stopcock must be placed between the hose line and the domestic water connection to cut off the water supply, if necessary. All devices and equipment used to supply water must comply with the regulations in force in the respective country. Do not damage or kink the water supply line during installation.

The solenoid is at the bottom on the back of the appliance. It has a metric R3/4 connecting thread.

For specialist staff:

The back of the appliance must be accessible to connect the stainless steel hose:

**WARNING**

Risk of injury.
Cuts from a broken auxiliary tool Fig. 27 (6).
Only use an auxiliary tool Fig. 27 (6) at room temperature.

- Slide the nut Fig. 27 (4) over the straight end of the hose Fig. 27 (3) up to the end and secure.
- Insert the filter Fig. 27 (2) into the nut Fig. 27 (4).
  - The filter Fig. 27 (2) rests flat on the straight end of the hose Fig. 27 (3) and is easily retained.
- Connect the nut Fig. 27 (4) to the cut-off valve Fig. 27 (3) with the filter resting on the straight end of the hose Fig. 27 (2).
- Open the water supply cut-off valve Fig. 27 (1) temporarily to bleed the water pipe and fill it with water. Keep the hose in a bucket.
- Remove the cover Fig. 27 (10).
- Slide the nut Fig. 27 (7) over the angled end of the hose Fig. 27 (8) up to the end and secure.
- Moisten the seal Fig. 27 (9) and push into the nut Fig. 27 (7) on the end of the angled hose Fig. 27 (8).
- The seal Fig. 27 (9) lies flat on the angled end of the hose Fig. 27 (8) and is easily retained.

**NOTICE**

Risk of damaging the threads of the solenoid.
Locate the nut carefully and screw onto the thread.

- Connect the nut Fig. 27 (7) to the solenoid Fig. 27 (8) with the seal resting on the Fig. 27 (9) angled end of the hose Fig. 27 (11).
- Tighten connections with the auxiliary tool Fig. 27 (6) clockwise until the maximum torque is reached and the auxiliary tool Fig. 27 (6) is overwound.

Open the water supply cut-off valve Fig. 27 (1) and check the whole water system for leaks.
Hook the clip Fig. 27 (5) into the auxiliary tool Fig. 27 (6) and fix it to the stainless steel pipe to store it.

4.5 Insertion into a row of kitchen units

For 600 mm wide appliances:

<table>
<thead>
<tr>
<th>A [mm]</th>
<th>B [mm]</th>
<th>C [cm²]</th>
<th>D [mm]</th>
<th>E [mm]</th>
</tr>
</thead>
<tbody>
<tr>
<td>665</td>
<td>65</td>
<td>Min. 300</td>
<td>Min. 50</td>
<td>Min. 46</td>
</tr>
</tbody>
</table>

For 700 mm wide appliances:

<table>
<thead>
<tr>
<th>A [mm]</th>
<th>B [mm]</th>
<th>C [cm²]</th>
<th>D [mm]</th>
<th>E [mm]</th>
</tr>
</thead>
<tbody>
<tr>
<td>750</td>
<td>65</td>
<td>Min. 350</td>
<td>Min. 50</td>
<td>Min. 46</td>
</tr>
</tbody>
</table>

* If wall spacers are used, the dimensions increase by 15 mm (see 4.2).

The dimensions apply for an opening angle of 90°. Spacing angles will vary according to the opening angle.
You can purchase a kit to limit the door opening angle to 90° on soft closing appliances. Please contact our customer service team.*

The appliance can be built into kitchen units. A top cupboard Fig. 28 (2) can be added above the appliance in order to bring the appliance Fig. 28 (1) up to the height of the fitted kitchen units.
The appliance can be installed right next to the kitchen cabinet Fig. 28 (3). The appliance must stick out by the depth Fig. 28 (B) from the front of the cabinet so that the doors can be opened fully. The appliance may protrude further depending on the depth of the kitchen cabinets and whether wall spacers are used.

* Depending on model and options
**NOTICE**
Danger of overheating due to insufficient air ventilation!
The compressor may be damaged if there is insufficient air ventilation.
▶ Take care to ensure adequate air ventilation.
▶ Observe the ventilation requirements.

Ventilation requirements:
- Spacer ribs on the back of the appliance provide sufficient air ventilation. In the final appliance position, these must not be placed in recesses or cut-outs.
- There must be a ventilation shaft with the depth Fig. 28 (D) at the back of the top cupboard over the entire width of the cupboard.
- The ventilation shaft Fig. 28 (C) must be observed under the ceiling.
- The larger the ventilation space, the more energy-saving the appliance is in operation.

If the appliance is installed with the hinges next to a wall Fig. 28 (4) the distance Fig. 28 (E) between the appliance and the wall must be observed. This is how far the handle protrudes when the door is open.

### 4.6 Disposing of packaging

**WARNING**
Danger of suffocation due to packing material and plastic film!
▶ Do not allow children to play with packing material.

The packaging is made of recyclable materials:
- corrugated board/cardboard
- expanded polystyrene parts
- polythene bags and sheets
- polypropylene straps
- nailed wooden frame with polyethylene panel*
▶ Take the packaging material to an official collecting point.

### 4.7 Connecting the appliance

**WARNING**
Failure to connect properly
Fire hazard.
▶ Do not use an extension cable.
▶ Do not use distributor blocks.

**NOTICE**
Failure to connect properly
Damage to the electronics.
▶ Do not use a standalone inverter.
▶ Do not use an energy saving plug.

**Note**
Only use the power connection lead supplied.
▶ A longer power connection lead can be ordered from Customer Service.

### 4.8 Switching on the appliance

**Note**
If the appliance is in demo mode, DEMO appears on the home-screen.
▶ Disable demo mode (see 7).

**Note**
The manufacturer recommends:
▶ Store frozen produce at -18 °C or colder.

Connect and switch on appliance approx. 2 hours before loading for the first time.

#### 4.8.1 Switch on appliance

If the standby symbol is displayed over the whole screen:
▶ Press the standby symbol.
▶ The appliance is switched on. The display switches to the home screen.
▶ The appliance sets itself to the displayed temperature. This is shown by down arrows.

If the standby symbol is displayed in the freezer compartment field:
▶ Press the standby symbol.
▶ The appliance is switched on.
▶ The appliance sets itself to the displayed temperature. This is shown by down arrows.

* Depending on model and options
If the screen is black:
- **Touch the screen.**
- **The standby symbol appears on the whole screen.**
- **Press the standby symbol.**
- **The appliance is switched on. The display switches to the home screen.**
- **The appliance sets itself to the displayed temperature. This is shown by down arrows.**

### 4.9 Setting the clean ventilation grid timer
The ventilation grid must be cleaned at least once a year for sufficient ventilation. The timer can be set as a reminder.
- **Press menu.**
- **Press the navigation arrows until the ventilation grid symbol is displayed.**
- **Press ON.**
- **The timer is set. After the interval has expired a message prompts you to clean the ventilation grid.**

### 5 Control

#### 5.1 Changing the temperature unit
The temperature display can be switched from °C to °F.
- **Press menu.**
- **Press the navigation arrow until °C is displayed.**
- **Press °F.**
- **The temperature is displayed in °F.**

Switch from °F to °C in the same way.

#### 5.2 Child proofing
The child-proofing function enables you to make sure that the appliance is not inadvertently switched off by playing children.

- **5.2.1 Switching on the child safety device**
  - **Press menu.**
  - **Press the navigation arrows until the child safety device is displayed.**
  - **Press ON.**
  - **The child safety device is switched on.**

- **5.2.2 Switching the child safety device off**
  - **Press menu.**
  - **Press the navigation arrows until the child safety device is displayed.**
  - **Press OFF.**
  - **The child safety device is switched off.**

#### 5.3 Sabbath Mode
This function meets the religious requirements on the Sabbath or Jewish feast days. When Sabbath mode is on some of the electronic control functions are switched off. After setting Sabbath mode you no longer need to worry about indicator lamps, figures, symbols, displays, alarm messages and fans. The thawing cycle only works for the specified time without taking account of fridge use. After a power cut the appliance automatically switches back to Sabbath mode.

There is a list of Star-K certified appliances at www.star-k.org/appliances.

### 5.3.1 Switching SabbathMode on.
- **Press menu.**
- **Press the navigation arrow until SabbathMode is displayed.**
- **Press ON.**
- **SabbathMode is switched on. Only the SabbathMode symbol appears on the screen.**

SabbathMode switches off automatically after 120 hours if it has not already been switched off manually. The display switches to the home screen.

#### 5.3.2 Switch off the SabbathMode
- **Touch the screen.**
- **Press OFF.**
- **SabbathMode is switched off.**

#### 5.4 Freezing food
The rating plate indicates the maximum quantity of fresh food you can freeze within 24 hours (see 1) under "Freezing capacity ... kg/24h".

For 600 mm wide appliances:*  
The top drawer can be loaded with a max. of 15 kg, the bottom drawer with a max. of 10 kg and the other drawers each with a max. of 25 kg.  
- The shelves can each be loaded with 35 kg of frozen food.*  
- The shelves can each be loaded with 35 kg of frozen food.*  

For 700 mm wide appliances:*  
The top drawer can be loaded with a max. of 15 kg, the bottom drawer with a max. of 15 kg and the other drawers each with a max. of 25 kg.  
- The shelves can each be loaded with 55 kg of frozen food.*  

Closing the door creates a vacuum. After closing, wait for around 1 minute, then the door will be easier to open.

### CAUTION
Risk of injury due to broken glass!  
Bottles and cans containing drinks may burst when being frozen. This applies particularly to sparkling drinks.  
- Do not freeze bottles and cans containing drinks!

In order that the food is rapidly frozen through to the core, do not exceed the following quantities per pack:
- Fruit, vegetables up to 1 kg  
- Meat up to 2.5 kg
Pack the food in portions in freezer bags, reusable plastic, metal or aluminium containers.

5.5 Storage life

<table>
<thead>
<tr>
<th>Food Type</th>
<th>Storage Life</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ice-cream</td>
<td>2 to 6 months</td>
</tr>
<tr>
<td>Sausage, ham</td>
<td>2 to 6 months</td>
</tr>
<tr>
<td>Bread, bakery products</td>
<td>2 to 6 months</td>
</tr>
<tr>
<td>Game, pork</td>
<td>6 to 10 months</td>
</tr>
<tr>
<td>Fatty fish</td>
<td>2 to 6 months</td>
</tr>
<tr>
<td>Lean fish</td>
<td>6 to 12 months</td>
</tr>
<tr>
<td>Cheese</td>
<td>2 to 6 months</td>
</tr>
<tr>
<td>Poultry, beef</td>
<td>6 to 12 months</td>
</tr>
<tr>
<td>Vegetables, fruit</td>
<td>6 to 12 months</td>
</tr>
</tbody>
</table>

The values indicated for storage life are standard ones.

5.6 Thawing food

- in the refrigerator compartment
- in a microwave oven
- in a conventional or fan oven
- at room temperature

➤ Remove only as much food as is required. Use thawed food as quickly as possible.
➤ Food once thawed should be re-frozen only in exceptional cases.

5.7 Setting the temperature

The temperature depends on the following factors:
- the amount of times the door is opened
- the room temperature of the installation site
- the type, temperature and amount of food

The temperature can be set from -28 °C to -14 °C.

Recommended temperature setting: -18 °C
➤ Press the freezer compartment field.
➤ The following screen is displayed:

![Fig. 30](image)

Setting a higher temperature:
➤ Press plus.
Setting a lower temperature:
➤ Press minus.

The minus symbol is greyed out when the coldest temperature is selected.
The plus symbol is greyed out if it is pressed again after selecting the hottest temperature. The standby symbol is displayed on the screen.

➤ Confirm the required temperature with OK.
➤ The display switches to the home screen.
➤ The selected temperature is displayed.
➤ Up or down arrows indicate the change in temperature. The arrows are greyed out when the target temperature is reached.

5.8 Status display*

The status display shows you the status of the appliance when the door is closed. If the door is open the status display is greyed out.

<table>
<thead>
<tr>
<th>Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Blue light</td>
<td>The appliance is working perfectly.</td>
</tr>
<tr>
<td>Red pulsating light</td>
<td>Temperature alarm (see 8.2)</td>
</tr>
<tr>
<td></td>
<td>Appliance faults (see 8.4)</td>
</tr>
</tbody>
</table>

5.8.1 Switching the status display on

➤ Press menu.
➤ Press the navigation arrows until the status display appears.
➤ Press ON.
➤ The status display is switched on.

5.8.2 Switching the status display off

➤ Press menu.
➤ Press the navigation arrows until the status display appears.
➤ Press OFF.
➤ The status display is switched off.

5.9 SuperFrost

With this function you can freeze fresh food quickly through to the core. The appliance operates with maximum refrigeration. The noise of the refrigeration unit may be temporarily louder as a result.

You can freeze as many kilograms of fresh food within 24 hrs as is indicated on the type plate under “Freezing capacity ... kg/24hrs”. This maximum freezing quantity can vary depending on model and climate class.

You have to activate SuperFrost in good time, depending on how much fresh food is to be frozen: about 6 hours before placing the food inside in case of small amounts and about 24 hours in advance in case of the maximum amount of food to be frozen.

Wrap produce and spread it out as far as possible. Do not allow produce to be frozen to touch produce that is already frozen to prevent the latter thawing.

You do not have to activate SuperFrost in the following cases:
- when placing frozen food in the freezer
- when freezing up to approx. 1 kg fresh food daily

5.9.1 Switching SuperFrost on.

➤ Press menu.
➤ Press the navigation arrow until SuperFrost is displayed.
➤ Press ON.
➤ SuperFrost is switched on.
➤ The freezer temperature goes down and the appliance works at maximum cooling capacity.
➤ If there is a small amount of frozen food:
   ➤ wait about 6 hours.
   ➤ Place packaged food in the top drawers.
   With the maximum amount of frozen food (see model plate):
   ➤ wait about 24 hours.
   ➤ Remove top drawers and place food directly on the upper shelves.
   ➤ SuperFrost switches itself off automatically after about 65 hours.
   ➤ The SuperFrost symbol is greyed out.
   ➤ Put the food in the drawers and close them again.

* Depending on model and options
Control

➢ The appliance works in normal mode again.

5.9.2 Switching off SuperFrost

➢ Press menu.
➢ Press the navigation arrow until SuperFrost is displayed.
➢ Press OFF.
➢ SuperFrost is switched off.

5.10 Drawers

Note

The energy consumption increases and the cooling performance reduces if the air ventilation is insufficient.
➢ Ensure that the air slits of the fan on the rear wall are always kept free!

➢ To store frozen food directly on the shelves: pull the drawer forwards and lift it out.*
➢ To store frozen food directly on the shelves: raise the drawer at the back and pull it out forwards.*

5.11 Shelves

5.11.1 Moving shelves

➢ To remove the shelf: lift up at the front and pull out.
➢ To put the shelf back: simply push in as far as it will go.

5.11.2 Removing shelves

➢ The shelves may be removed for cleaning.*

5.12 VarioSpace

You can remove the shelves and drawers. This leaves more room for larger food items such as poultry, meat, large game and tall baked goods, which can be frozen whole before further preparation.

For 600 mm wide appliances:* ➢ The top drawer can be loaded with a max. of 15 kg, the bottom drawer with a max. of 10 kg and the other drawers each with a max. of 25 kg.*
➢ The shelves can each be loaded with 35 kg of frozen food.*

For 700 mm wide appliances:* ➢ The top drawer can be loaded with a max. of 15 kg, the bottom drawer with a max. of 15 kg and the other drawers each with a max. of 25 kg.*
➢ The shelves can each be loaded with 55 kg of frozen food.*

5.13 Extractor rails*

➢ For cleaning glass panels
Extractor rails Removal: press front support hooks upwards (1) and slide extractor rail to one side (2) and backwards (3).

➢ Installing extractor rail: attach hook at back (1) and engage at front (2).

5.14 Cold storage accumulators

The cold storage accumulators prevent the temperature from rising too fast in the event of power failure.

5.14.1 Using cold storage accumulators

➢ Place the frozen cold storage accumulators on the frozen food in the upper front area of the freezer compartment.

5.15 IceMaker*

The IceMaker is in the fifth drawer from the top on the left.

Make certain that the following conditions are met:
- The appliance is level.
- The appliance is connected.
- The IceMaker is connected to the water supply.*

5.15.1 Producing ice cubes*

The production capacity depends on the freezer temperature. The lower the temperature, the more ice cubes can be produced in a specific period.

The ice cubes drop from the IceMaker into the drawer. When a certain filling level has been reached, no further ice cubes are produced. The IceMaker does not fill the drawer right up to the brim.

Distribute the ice cubes evenly in the drawer to increase the capacity.

If large quantities of ice cubes are needed, the complete IceMaker drawer can be exchanged for the adjacent drawer. When the drawer is closed, the IceMaker automatically re-commences production.

* Depending on model and options
Once the IceMaker has been switched on for the first time, it may take up to 24 hours until the first ice cubes are produced.

**Note**

When the appliance is used for the first time and if it has been out of use for a long time, particles may collect in the IceMaker and/or water conduit.▷ Do not use or consume ice cubes that have been made 24 hours after the first ice cubes are made.

5.15.2 **Switch the IceMaker on.**

1. Press Menu.
2. Press the navigation arrows until the IceMaker is displayed.
3. Press the IceMaker symbol.
4. The IceMaker is switched on.

**Note**

The IceMaker only makes ice cubes when the drawer is completely closed.

**Flushing**

Flushing function to rinse out the water pipe when used for the first time.

**Note**

The water pipe can only be rinsed out if the temperature is more than 0 °C.

▷ Only use the flushing option if the temperatures in the appliance are higher than 0 °C.

**NOTICE**

Blocked IceMaker and water outlet.

Risk of damage to the IceMaker and the drawer outlet.

▷ Put containers with a maximum height of 7 cm in the drawer under the IceMaker.

Ensure that the IceMaker drawer is empty.

▷ Put containers with a max. height of 7 cm in the drawer under the IceMaker.

1. Press Menu.
2. Press the navigation arrows until the IceMaker is displayed.
3. Press the IceMaker symbol.
4. Press the navigation arrows until flushing is displayed.

1. Press ON.
   ▷ Water pipes are rinsed and at the same time the ice cube tray and ice cube tray is turned back to the cleaning position.
2. Do not operate the screen during this procedure.
3. Flushing function terminated: The symbol appears.
4. Press OK.

▷ Remove the drawer and the container.
5. Clean the drawer and, if necessary, remove excess water from the drawer.

5.15.3 **IceMaker holiday function**

The IceMaker holiday function is suitable for short phases when no ice cubes are to be made, for example, when you are on holiday.

**Switching the IceMaker holiday function on.**

The IceMaker drawer must be emptied and pushed in.

1. Press menu.
2. Press the navigation arrows until the IceMaker is displayed.
3. Press the IceMaker symbol.
4. Press the navigation arrows until flushing is displayed.
5. Press ON.
6. The ice cube tray moves to the cleaning position.
7. The IceMaker switches to holiday function.
8. The IceMaker holiday function symbol appears in the menu area.
9. Remove the drawer.
10. Clean the ice cube tray and drawer with a soft cleaning cloth and warm water. If necessary use a mild detergent. Then rinse out.
11. Push the drawer in.

**NOTICE**

Sickness caused by dirty ice compartment.

▷ After the IceMaker has been switched off for a long time, clean the ice cube tray.

- Remove rinse agent residue: Discard the first three batches of ice cubes.
- Remove the drawer.
- Clean the ice cube tray and drawer with a soft cleaning cloth and warm water. If necessary use a mild detergent. Then rinse out.
- Push the drawer in.
- Press Menu.
- Press the navigation arrows until the IceMaker is displayed.
- Press the IceMaker symbol.
- Press OFF.
- The ice cube tray moves to the operating position. The IceMaker switches on.
- The IceMaker symbol appears in the menu field instead of the IceMaker holiday function symbol.

5.15.4 **Switching off the IceMaker**

If no ice cubes are required, the IceMaker can be switched off independently of the freezer compartment.

When the IceMaker is switched off, the drawer of the IceMaker can also be used for freezing and storing food.

1. Cleaning the IceMaker (see 6.4).
2. Press Menu.
3. Press the navigation arrows until the IceMaker is displayed.
4. Press the IceMaker symbol.
5. Press OFF.
6. The IceMaker is switched off.
7. If necessary, food can now be frozen in the drawer up to a maximum height of 7 cm.

6 **Maintenance**

6.1 **Defrosting with NoFrost**

The NoFrost system automatically defrosts the appliance.

The moisture condenses on the evaporator, is periodically defrosted and evaporates.

▷ The appliance does not have to be manually defrosted.

6.2 **Cleaning the ventilation grid**

The ventilation grid ensures that the appliance works properly due to optimum aeration and ventilation.

▷ Clean the ventilation grid regularly with a vacuum cleaner.

* Depending on model and options
6.3 Cleaning the appliance

**WARNING**
Risk of injury and damage as a result of hot steam! Hot steam can lead to burns and can damage the surfaces.

- Do not use any steam cleaners!

**NOTICE**
Incorrect cleaning damages the appliance!
- Do not use cleaning agents in concentrated form.
- Do not use any scouring or abrasive sponges or steel wool.
- Do not use any sharp or abrasive cleaning agents, nor any that contain sand, chloride or acid.
- Do not use chemical solvents.
- Do not damage or remove the type plate on the inside of the appliance. It is important for the customer service.
- Do not pull off, bend or damage cables or other components.
- Do not allow any cleaning water to enter the drain channel, ventilation grille or electrical parts.
- Please use soft cleaning cloths and a universal pH-neutral cleaning agent.
- Please use cleaning and care products suitable for contact with foodstuffs in the appliance interior.

- Empty appliance.
- Pull out the power plug.

- Clean plastic outer and inner surfaces with lukewarm water and a little washing-up liquid.
- Only use a soft clean cloth to wipe side walls with a paint finish. In the case of heavy soiling, use lukewarm water with neutral cleaning agent.*

---

**NOTICE**
Risk of damage from stainless steel care products!
The stainless steel doors and stainless steel side panels are treated with a premium surface finish.

Stainless steel care products attack these surfaces.
- Only use a soft, clean cloth to wipe down finished door and side panel surfaces and painted door and side panel surfaces. To remove heavy dirt, use a little water or neutral detergent. Alternatively, you can use a micro-fibre cloth.

- Do not treat the lettering on the painted door surfaces with harsh, abrasive agents. Wipe off any dirt with a soft cloth and some water or neutral cleaner.*
- Most of the parts can be dismantled for cleaning: see the relevant chapter.

- Clean drawers by hand with lukewarm water and a little washing up liquid.
- All the other fittings can be put in the dishwasher.
- Only use a damp cloth to clean the telescopic rails. The grease in the runners is for lubrication purposes and must not be removed.*

**After cleaning:**
- Wipe dry the appliance and items of equipment.
- Connect the appliance and switch it on again.
- Switch on SuperFrost (see 5.9).
- When the temperature is sufficiently cold:
- Put the food back inside.

6.4 Cleaning the IceMaker*

The IceMaker drawer must be emptied and pushed in. The IceMaker must be switched on.
- Press Menu.
- Press the navigation arrows until the IceMaker is displayed.
- Press the IceMaker symbol.
- Press ON.
  - The ice cube tray moves to the cleaning position.
  - The screen cannot be used during this process.
- OFF appears: The rotary movement stops and the IceMaker switches off for cleaning.
- Remove the drawer.
- Clean the ice cube tray and drawer with a soft cleaning cloth and warm water. If necessary use a mild detergent. Then rinse out.
- Push the drawer in.
- Press OFF.
  - The ice cube tray moves to the operating position.

**NOTICE**
Rinse agent residue in the ice compartment and drawer.
Nausea or irritation of the mucous membrane.
- Remove rinse agent residue: Discard the first three batches of ice cubes.
- Leave the IceMaker switched on.
- Switch the IceMaker off (see 5)

6.5 Customer service

First of all check whether you can eliminate the fault yourself. (see 7) If you can't, contact Customer Services. You can find the address in the enclosed customer service list.

* Depending on model and options
Malfunctions

WARNING
Risk of injury if repair work is not carried out professionally!
► Have any repairs and action - not expressly specified - on the appliance and mains cable carried out by service personnel only. (see 6)

Displaying the appliance description (model and index), service no. (service) and serial no. (S. no.) on the screen:
► Press menu.
► Press the navigation arrows until the appliance information symbol is displayed.
► Press the appliance information symbol.
► The appliance information is displayed.
► Note down the appliance information.
► To return to the home screen press the Back symbol.

Close the door.
► Contact customer service and give them the required appliance information.
► This will help us to provide you with a faster, more accurate service.
► Follow any further instructions given by Customer Services.
Alternatively you can read off the appliance information from the model plate:
► Read off the appliance name Fig. 31 (1), service no. Fig. 31 (2) and serial no. Fig. 31 (3) from the model plate. The model plate can be found on the inside of the appliance on the left.

Licence agreements:
Licenses used can be viewed at ©.
► Press ©.

7 Malfunctions
Your appliance is designed and manufactured for a long life span and reliable operation. If a malfunction nonetheless occurs during operation, check whether it is due to a handling error. In this case you will have to be charged for the costs incurred, even during the warranty period. You may be able to rectify the following faults yourself:

Appliance does not work.
► The appliance is not switched on.
► Switch on the appliance.
► The power plug is not properly inserted in the wall socket.
► Check power plug.
► The fuse of the wall socket is not in order.
► Check fuse.
► The appliance plug does not fit the appliance properly.
► Check the appliance plug.

The compressor runs for a long time.
► The compressor switches to a low speed when little cold is needed. Although the running time is increased as a result, energy is saved.
► This is normal in energy-saving models.
► SuperFrost is activated.
► The compressor runs for longer in order to rapidly cool the food. This is normal.

Excessive noise.
► Due to the various speed steps, speed-regulated* compressors can generate different running noises.
► The sound is normal.

A bubbling and gurgling noise.
► This noise comes from the refrigerant flowing in the refrigeration circuit.
► The sound is normal.

A quiet clicking noise.
► The noise is produced whenever the refrigeration unit (motor) automatically switches on or off.
► The sound is normal.

A hum. It is briefly a little louder when the refrigeration unit switches on.
► The refrigeration increases automatically when the SuperFrost, function is activated, fresh food has just been placed in the appliance or the door has been left open for a while.
► The sound is normal.
► The ambient temperature is too high.
► Solution: (see 1.2)

A low hum.
► The sound is produced by air flow noise of the fan.
► The sound is normal.

Vibration noises
► The appliance is not standing firmly on the floor. As a result objects and adjacent units start to vibrate when the refriger- ator is running.
► Align the appliance using the adjustable feet.

Flow sound at the soft stop mechanism.*
► The noise is produced when the door is opened and closed.
► The sound is normal.

The DEMO symbol appears on the screen. In addition some time elapses.
► DEMO mode is activated.
► Press STOP.

DEMO is displayed in the top right corner of the screen.
► DEMO mode is activated.
► Unplug the appliance.
► Plug the appliance in again.
► The DEMO symbol appears on the screen. In addition some time elapses.
► Press STOP.

The outer surfaces of the appliance are warm*.
► The heat of the refrigeration circuit is used to prevent condensate from forming.
► This is normal.

The IceMaker cannot be switched on.*
► The appliance and therefore the IceMaker are not connected.
► Connect the appliance to the mains (see 4).

The IceMaker does not make any ice cubes.*
► The IceMaker is not switched on.
► Switch on the IceMaker.
► The drawer of the IceMaker is not properly closed.
► Close the drawer properly.
► The water connection is not open.
► Open the water connection.*

Functions in the IceMaker submenu do not start.*
► Ice cube tray rotates.
► Try again after 1 minute.

* Depending on model and options
Messages

The temperature is not cold enough.
→ The door of the appliance is not properly closed.
  ► Close the door of the appliance.
  ► Insufficient ventilation.
  ► Keep ventilation grille clear, and clean it.
  → The ambient temperature is too high.
  ► Solution: (see 1.2).
  → The appliance was opened too frequently or for too long.
  ► Wait to see whether the appliance reaches the required temperature by itself. If not, please contact the after sales service (see 6).
  → Too much fresh food was placed inside without SuperFrost.
  ► Solution: (see 5.9)
  → The temperature is incorrectly set.
  ► Set the temperature to a colder setting and check after 24 hours.
  → The appliance is too close to a source of heat (stove, heater etc).
  ► Change the position of the appliance or the source of heat.
The status display does not light up.*
→ The status display is switched off.
  ► Switch the status display on.
  → The door is open.
  ► Close the door.
  → The appliance is switched off.
  ► Switch the appliance on.
  → LED is faulty.
  ► Contact Customer Services (see 6).
The internal light does not come on.*
→ The appliance is not switched on.
  ► Switch the appliance on.
  → The door was open for longer than 15 minutes.
  ► The internal light switches itself off automatically after about 15 minutes if the door is open.
  → The LED illumination is faulty or the cover is damaged.

⚠️ WARNING
Risk of injury due to electric shock!
Live parts are located under the cover.
 ► Have the LED interior light changed or repaired only by the customer service or by specialized personnel trained for the purpose.

⚠️ WARNING
Danger of injury by LED lamp!
The lighting intensity of the LED light complies with laser class RG 2.
If the cover is defective:
 ► Do not look into the illumination with optical lenses from the immediate proximity. This can cause injury to the eyes.
The door seal is defective or needs to be replaced for another reason.
→ The door seal can be replaced. It can be replaced without the need for special tools.
  ► Contact Customer Service (see 6).:
The unit has iced up or condensation has formed.
→ The door seal may have also slipped out of its groove.
  ► Check to ensure that the door seal is seated properly in the groove.

8 Messages
Error messages and reminders are displayed by an audible signal and a message on the screen. The audible signal gets louder and louder when error messages appear. It only stops when the message is confirmed. Highest priority messages are displayed first if several occur at the same time. Each message must be cleared separately.
The message stays in the menu field as long as it is active or the fault is not eliminated.

Note
Details on the message can be displayed again via the menu field.
 ► Press menu.
  ► Press the message symbol.
  ► The display switches to the next message when you press one. After the last active message the display switches to the home screen.

Door alarm
An audible warning sounds if the door is open for longer than 60 seconds. The door alarm symbol appears on the display. The audible warning stops automatically when the door is closed.
The audible warning can be switched off when the door is open. The audible alarm is switched off while the door is open.
  ► Press the door alarm symbol.
  ► The door alarm stops.
  ► The display switches to the home screen.
  ► Close the door.
Temperature alarm
An audible signal sounds if the temperature is not cold enough. The temperature alarm symbol appears on the display.
Appliances with a status display: When the status display is active and the door is closed, a red light appears at the same time.*
The temperature had risen too high during the last few hours or days. When the fault is eliminated the appliance continues to work at the last temperature setting.
The reason for too high a temperature may be:
  - hot, fresh food was inserted
  - too much warm room air flowed in when rearranging and removing food
  - the power was cut off for a while
  - the appliance is faulty
  ► Open the door.
  ► Appliances with a status display: When the status display is activated, the pulsing red light goes out.*
  ► Press the temperature alarm symbol.
  ► The audible signal stops. The warmest temperature reached during the malfunction is displayed on the screen.
  ► Press the screen or wait for 30 seconds.

9.2 Taking the appliance out of service

1. Empty the appliance.
2. Put the IceMaker in the cleaning position (see 6).*
3. Switch off the appliance (see 9).
4. Remove mains connector.
5. Remove appliance connector if required: Remove and move from left to right at the same time.
6. Clean the appliance (see 6.3).
7. Leave the door open to prevent odour.

10 Disposing of the appliance

The appliance contains some reusable materials and should be disposed of properly - not simply with unsorted household refuse. Appliances which are no longer needed must be disposed of in a professional and appropriate way, in accordance with the current local regulations and laws.

When disposing of the appliance, ensure that the refrigeration circuit is not damaged to prevent uncontrolled escape of the refrigerant it contains (data on type plate) and oil.
1. Disable the appliance.
2. Pull out the plug.
3. Cut through the connecting cable.

* Depending on model and options
