10 Disposing of the appliance ................................. 22

The manufacturer works constantly on the further development of all the types and models. Therefore please understand that we have to reserve the right to make design, equipment and technical modifications.

To get to know all the benefits of your new appliance, please read the information contained in these instructions carefully.

The instructions apply to several models. Differences may occur. Text relating only to specific appliances is marked with an asterisk (*).

Instructions for action are marked with a ▶, the results of action are marked with a ◄.

1.2 Appliance range of use

Intended use

The appliance is only suitable for cooling food products in a domestic or household-like environment. This includes, for example, use:

- in staff kitchens, bed and breakfast establishments,
- by guests in country houses, hotels, motels and other accommodation,
- for catering and similar services in the wholesale trade.
All other types of use are not permitted.

**Foreseeable misuse**
The following applications are expressly forbidden:
- Storing and refrigerating medicines, blood plasma, laboratory preparations or similar substances and products based on the Medical Device Directive 2007/47/EC
- Use in areas at risk of explosions
- Use on moving substrates, such as ships, rail travel or aeroplanes
- Storing live animals
Misusing the appliance may lead to damage to the goods stored or they may spoil.

**Climate classifications**
Depending on the climate classification the appliance is designed to operate in restricted ambient temperatures. The climate classification applying to your appliance is printed on the rating plate.

<table>
<thead>
<tr>
<th>Climate classification</th>
<th>for ambient temperatures of</th>
</tr>
</thead>
<tbody>
<tr>
<td>SN</td>
<td>10 °C to 32 °C</td>
</tr>
<tr>
<td>N</td>
<td>16 °C to 32 °C</td>
</tr>
<tr>
<td>ST</td>
<td>16 °C to 38 °C</td>
</tr>
<tr>
<td>T</td>
<td>16 °C to 43 °C</td>
</tr>
</tbody>
</table>

**Note**
- Keep to the specified ambient temperatures in order to guarantee that the appliance works properly.

1.3 Conformity
The refrigerant circuit has been tested for leaks. This appliance complies with the applicable safety stipulations and with directives 2014/35/EU, 2014/30/EU, 2009/125/EG, 2011/65/EU and 2010/30/EU.
The BioFresh compartment satisfies the requirements for a cold storage compartment in acc. with DIN EN 62552.

1.4 Product data
Product data is included with the appliance, as per Directive (EU) 2017/1369. The complete product data sheet is available on the Liebherr website under Downloads.

1.5 External dimensions of the appliance

![Diagram of appliance dimensions]

<table>
<thead>
<tr>
<th>Model</th>
<th>Appliance height H (mm)</th>
</tr>
</thead>
<tbody>
<tr>
<td>KB(es) 37..</td>
<td>1650</td>
</tr>
<tr>
<td>(S)KB(bs/es/i/es) 43..</td>
<td>1850</td>
</tr>
</tbody>
</table>

* If wall spacers are used, the dimensions increase by 15 mm (see 4.2).
Dimensions when the door is open apply to an opening angle of 115 °. Clearance dimensions vary according to the opening angle.

1.6 Saving energy
- Pay attention to good ventilation. Do not cover ventilation holes or grids.
- Always keep the fan air slits clear.
- Do not install the appliance in direct sunlight, next to an oven, radiator or similar.
- Energy consumption is dependent on the installation conditions, e.g. ambient temperature (see 1.2). If the ambient temperature deviates from the standard temperature of 25 °C, the energy consumption may differ.
- Open the appliance for as short a time as possible.
- The lower the temperature is set, the higher the energy consumption.
- Arrange the food in an organised way (see 1).
- Keep all food properly packed and covered. This prevents frost from forming.
- Only take food out for as long as necessary so that it doesn’t warm up too much.
- Inserting warm food: allow to cool down to room temperature first.

* Depending on model and options
- Use the holiday function if you intend to be away for an extended period (see 5.4.4).

1.7 Example of contents arrangement

1.8 Smart device

The appliance is ready for integration into a smart home and for extended services. Other options can be selected with a SmartDeviceBox. This is activated via the MyLiebherr customer portal.

You will find more information about availability and prerequisites and the individual options on the website www.smartdevice.liebherr.com.

2 General safety information

Danger for the user:
- This device can be used by children and people with impaired physical, sensory or mental abilities or with a lack of experience and knowledge provided that they are supervised or have received instruction in the safe use of this device, and about the resulting hazards. Children must not play with this appliance. Cleaning and user maintenance work must not be carried out by children without adult supervision. Children aged between 3 and 8 are allowed to load and unload the appliance. Children below the age of 3 must be kept away from the appliance unless they are under continuous adult supervision.
- When disconnecting the appliance from the supply, always take hold of the plug. Do not pull the cable.
- In the event of a fault pull out the mains plug or deactivate the fuse.
- Do not damage the mains power cable. Do not operate the appliance with a defective mains power cable.
- Only customer service or other specially trained staff may repair or perform other operations on the appliance.
- Only assemble, connect and dispose of the appliance according to the instructions.
- Please keep these instructions in a safe place and pass them on to any subsequent owners.
- Special lights, such as LED lights on the appliance, are used to illuminate the interior of the appliance and are not suitable for room lighting.

Fire hazard:
- The coolant used (information on the model plate) is eco-friendly but also flammable. Any leaking coolant may ignite.
  - Do not damage the refrigerant circuit pipes.
  - Do not use an open flame or other source of ignition inside the appliance.
  - Do not use electrical appliances inside the appliance (e.g. steam cleaners, heaters, ice cream makers, etc.).
  - If the refrigerant leaks: remove any naked flames or ignition sources from the vicinity of the leakage point. Properly air the room. Inform customer services.
- Do not store explosives or sprays using combustible propellants such as butane, propane, pentane, etc. in the appliance. To identify these spray cans, look for the list of contents printed on the can, or a flame symbol. Gases possibly escaping may ignite due to electrical components.
- Keep burning candles, lamps and other items with naked flames away from the appliance so that they do not set the appliance on fire.
- Please be sure to store alcoholic drinks or other packaging containing alcohol in tightly closed containers. Any alcohol that leaks out may be ignited by electrical components.

Danger of tipping and falling:
- Do not misuse the plinth, drawers, doors etc. as a step or for support. This applies particularly to children.

Danger of food poisoning:
- Do not consume food which has been stored too long.

Danger of frostbite, numbness and pain:
- Avoid lasting skin contact with cold surfaces or refrigerated/frozen food or take protective steps, e.g. wear gloves. Do not consume ice cream, water ice or ice cubes immediately and do not consume them too cold.

Danger of injury and damage:

* Depending on model and options
- Hot steam can lead to injury. Do not use electrical heating or steam cleaning equipment, open flames or defrosting sprays to defrost.
- Do not use sharp implements to remove the ice.

**Danger of crushing:**
- Do not hold the hinge when opening and closing the door. Fingers may get caught.

**Symbols on the appliance:**

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>🚨🔥</td>
<td>The symbol can be located on the compressor. It refers to the oil in the compressor and indicates the following danger: Swallowing or inhaling can be fatal. This is only relevant for recycling. There is no danger in normal operation.</td>
</tr>
<tr>
<td>🔥</td>
<td>This symbol is found on the compressor and indicates the danger of flammable materials.</td>
</tr>
<tr>
<td>🚨</td>
<td>A sticker to this effect may be applied to the rear of the appliance. It refers to the foam-padded panels in the door and/or the housing. This is only relevant for recycling. Do not remove the sticker.</td>
</tr>
</tbody>
</table>

**Please observe the specific information in the other sections:**

<table>
<thead>
<tr>
<th>Type</th>

</table>

## 3 Controls and displays

### 3.1 Home screen

![Fig. 4](path/to/fig4)

- (1) Fridge compartment symbol
- (2) BioFresh symbol
- (3) Menu field
- (4) Screen

The home screen is the first screen the user sees. All settings can be made from there. All functions can be called up by touching the screen and values can be changed.

### 3.2 Operating structure

**Fridge compartment field**

![Fig. 5](path/to/fig5)

- (1) Fridge compartment symbol
- (2) Fridge compartment temperature display

The fridge compartment temperature is displayed in the fridge compartment field.

- Temperature settings
- Switch off appliance. Screen remains functional.

**BioFresh field**

![Fig. 6](path/to/fig6)

- (1) BioFresh symbol
- (2) BioFresh temperature display

Setting the Biofresh temperature (see 5.5).

**Menu field**

![Fig. 7](path/to/fig7)

- (1) Main menu
- (2) Option selected

The menu field gives access to the appliance options and settings. Selected options are also displayed.

### 3.3 Navigation

Touch the menu to access the individual options. An audible signal sounds after confirming an option or a setting. The display switches to the home screen.

**Standby:**
- Switches the appliance or temperature zone on.

**Menu:**
- Calls up options.

**Minus / Plus:**
- Changing settings (e.g. adjusting temperatures).
Putting into operation

Left/right navigation arrow:
Selects options and navigates through the menu.

You can scroll through the individual options using the navigation arrows. The first option is displayed again after the last one.

Back:
Cancels the selection.
The display switches to the next higher level or to the home screen.

OK:
Confirms the selection.
After confirmation the display switches to the home screen.

ON / OFF, START / STOP
Starts/stops options.
After selecting or cancelling an option the display switches to the home screen.

RESET:
 Resets timer.

Access to customer service

Note
If no selection is made after 1 minute the display switches to the home screen.

3.4 Display symbols
Display symbols provide information on the current appliance status:

- Up arrows:
The temperature increases.
- Down arrows:
The temperature reduces.
- Standby:
The appliance or temperature zone is switched off.
- Messages:
There are active error messages and reminders.

3.5 Appliance options
You can select or set the following options; explanations and setting options, (see 5):

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Option</th>
</tr>
</thead>
<tbody>
<tr>
<td>x</td>
<td>SabbathMode</td>
</tr>
<tr>
<td>lock</td>
<td>Child safety device x</td>
</tr>
<tr>
<td>holiday</td>
<td>Holiday function</td>
</tr>
<tr>
<td>F</td>
<td>Temperature unit</td>
</tr>
<tr>
<td>BioFresh</td>
<td>BioFresh</td>
</tr>
</tbody>
</table>

* If the option is selected, the relevant symbol is displayed in the menu field.
The symbol disappears if the option ends or is disabled.

4 Putting into operation

4.1 Transporting the appliance

CAUTION
Risk of injury and danger of damage as a result of incorrect transport!
- Transport the appliance in a packed condition.
- Transport the appliance upright.
- Do not transport the appliance without assistance.

4.2 Installing the appliance

WARNING
Fire hazard due to dampness!
If live parts or the mains lead become damp this may cause short circuits.
- The appliance is designed for use in enclosed areas. Do not operate the appliance outdoors or in areas where it is exposed to splash water or damp conditions.

WARNING
Risk of fire due to short circuit!
If the mains cable/connector of the appliance or of another appliance touch the rear of the appliance, the mains cable/connector may be damaged by the appliance vibrations, leading to a short circuit.
- Stand the appliance so that it is not touched by connectors or main cables.
- Do not plug the appliance or any others into sockets located near the rear of the appliance.

WARNING
Fire hazard due to refrigerant!
The coolant used is eco-friendly but also flammable. Any leaking coolant may ignite.
- Do not damage the piping of the refrigeration circuit.

* Depending on model and options
WARNING
Fire hazard and danger of damage!
► Do not place appliances emitting heat e.g. microwaves, toasters etc. on the appliance!

WARNING
Blocked ventilation openings pose a risk of fire and damage!
► Always keep the ventilation openings clear. Always ensure that the appliance is properly ventilated!

If your appliance is not a side-by-side (SBS) appliance:

NOTICE
Risk of damage due to condensate!*
► Do not install the appliance directly alongside a further refrigerator/freezer.

Note
If you have several appliances next to one another, leave a gap of 70mm between appliances. Otherwise condensation will build up between the units.*

Fig. 8*

q Before you connect the appliance, report any damage immediately to the delivery company.
q The floor of the installation site must be horizontal and even.
q Do not install the appliance in direct sunlight, next to an oven, radiator or similar.
q Install the appliance with the rear panel up against the wall and always use the supplied wall spacers (see below).
q Only ever move the appliance when it is empty.
q The surface supporting the appliance must be at the same level as the surrounding floor.
q Do not install the appliance on your own.
q The more coolant there is in the appliance, the larger the room in which the appliance is installed must be. If the room is too small, any leak may create a flammable mixture of gas and air. For each 8 g of coolant the installation space must be at least 1 m³. Information on the coolant is on the model plate inside the appliance.
q Remove the protective film from the outside of the appliance.*

Note
Risk of damage from stainless steel care products!
The stainless steel doors and stainless steel side panels are treated with a premium surface finish.

Stainless steel care products attack these surfaces.
► Only use a soft, clean cloth to wipe down finished door and side panel surfaces and painted door and side panel surfaces. To remove heavy dirt, use a little water or neutral detergent. Alternatively, you can use a micro-fibre cloth.
► Remove the protective film from the decorative trims.

► Remove all transit supports.
Spacers must be used to achieve the declared energy consumption and to prevent condensation in the event of high surrounding humidity. This increases the appliance depth by about 15 mm. The appliance will work perfectly well without the spacers but will have a slightly higher energy consumption.
► If your appliance comes with wall spacers, mount these on the back of the appliance, bottom left and right.

► Dispose of packaging material (see 4.5).

► Then support the door: Use saddle wrench SW10 to unscrew the base on mounting block (B) until it makes contact with the ground, then continue turning it for a further 90°. When a Side-by-Side appliance (S…) is fitted together with a second appliance (as a SBS combination):*
► Proceed according to the Side-by-Side combined fridge-freezer installation instructions. (Accessories bag of the SBS freezer/appliance with freezer compartment)*

Note
► Clean the appliance (see 6.4).
If the appliance is installed in a very damp environment, condensate may form on the outside of the appliance.
► Always see to good ventilation at the installation site.

4.3 Reversing the door
If necessary, you can change the way the door opens:
Ensure that the following tools are available:
q Torx® 25 (T25)
q Torx® 15 (T15)
q Slotted screwdriver
q Open-ended wrench SW10
q Spirit level
q Open-ended wrench supplied with the T25 tool
q If necessary, a cordless screwdriver
q Get a stepladder if necessary
q If necessary, a second person for assembly

* Depending on model and options
Putting into operation

NOTICE
Risk of condensation damage for Side-by-Side appliances!* Certain appliances can be set up as Side-by-Side combinations (two appliances next to each other).
If your appliance is a Side-by-Side (SBS) appliance:

> Set up the SBS combination in accordance with the enclosed document.

If the positioning of the devices is stipulated:

> Do not change the door hinges over.

4.3.1 Remove the soft stop mechanism

![Fig. 9](image)

- Open the door.

**NOTICE**
Risk of damage!
If the door seal is damaged, the door may fail to close properly and the cooling will be inadequate.

> Do not damage the door seal with the screwdriver!

- Remove the outer cover. Fig. 9 (1)
- Disengage and release the bearing bracket cover. Remove the bearing bracket cover. Fig. 9 (2)
- Unlatch the panel with a slotted screwdriver and swivel it to one side. Fig. 9 (3)

![Fig. 10](image)

- Engage the locking device in the opening. Fig. 10 (1)
- Unscrew the bolt with a screwdriver. Fig. 10 (2)
- Remove the bolt in an upward direction. Fig. 10 (3)
- Turn the hinge in the direction of the door. Fig. 10 (4)

**CAUTION**
Crushing hazard by joint folding up!

- Engage safety device.

4.3.2 Remove the door

**Note**
Remove any food from the door racks before removing the door, so that no food falls out.

![Fig. 11](image)

- Press the tab with the slotted screwdriver. Fig. 11 (1)
- Pull cover out of the catch mechanism. Fig. 11 (2)

![Fig. 12](image)

- Undo the soft stop mechanism screw with a T15 screwdriver approx. 14 mm. Fig. 12 (1)
- Insert a screwdriver behind the soft stop mechanism on the handle side and rotate forwards. Fig. 12 (2)
- Remove the soft stop mechanism. Fig. 12 (3)

* Depending on model and options
4.3.3 Moving the upper bearing parts to the other side

- Remove both screws with the T25 screwdriver.
- Lift and remove the bearing bracket.

Fig. 14

- Release the cover and remove from the side. Fig. 15 (1)
- Rotate the cover 180° and clip onto the other side from the right. Fig. 15 (2)
- Click the cover into place. Fig. 15 (3)
- Position the screw with a T25 screwdriver. Fig. 15 (4)
- Position the upper bearing bracket. Fig. 15 (5)
- Place the pins in the provided screw holes.
- Tighten the screw. Fig. 15 (4)
- Insert the screw with a T25 screwdriver and tighten. Fig. 15 (6)

Fig. 15

CAUTION
Risk of injury if the door tips!
- Take good hold of the door.
- Set down the door carefully.
- Carefully remove the protective cover. Fig. 13 (1)
- Undo the bolt a little with a T15 screwdriver. Fig. 13 (2)
- Hold the door and remove the bolts with your fingers. Fig. 13 (3)
- Pull the bearing bush out of the guide. Insert from the other side and click into place. Fig. 13 (4)
- Lift the door and set it aside.
- Carefully lift the plugs out of the door bearing bush with a slotted screwdriver and remove. Fig. 13 (5)

Fig. 13

* Depending on model and options
4.3.4 Moving the lower bearing parts to the other side

Fig. 16
- Lift the bearing pin completely upward and remove. Fig. 16 (1)
- Undo the screws with a T25 screwdriver and remove the bearing bracket Fig. 16 (2)

Fig. 17
- Remove the cover and fix it on the other side. Fig. 17 (1)
- Place the bearing bracket on the other side and screw in with the aid of a T25 screwdriver. Start with screw 2 at the bottom in the middle. Fig. 17 (2)
- Screw in screws 3 and 4. Fig. 17 (3, 4)
- Insert the bearing pin completely. Make sure that the catch mechanism is pointing to the rear. Fig. 17 (5)

4.3.5 Moving the handles to the other side

Fig. 18
- Pull off the cover. Fig. 18 (1)
- Remove the screws with the T15 screwdriver. Fig. 18 (2)
- Remove the handle. Fig. 18 (3)
- Carefully lift up the side plugs with a slotted screwdriver and pull them out. Fig. 18 (4)
- Insert the plugs again on the other side. Fig. 18 (5)

* Depending on model and options
4.3.6 Fitting the door

- Position the handle on the other side. Fig. 19 (1)
- The screw holes must be exactly above each other.
- Tighten the screws with the T15 screwdriver. Fig. 19 (2)
- Position the covers on the side and push in. Fig. 19 (3)
- Ensure that it clicks into place.

4.3.7 Aligning the door

**WARNING**
Risk of injury due to the door dropping out!

If the bearing parts are not screwed into place firmly enough, the door may drop out. This may lead to severe injuries. What is more, the door may not close and therefore the appliance may fail to cool properly.
- Screw the turn hinges firmly into place with 4 Nm.
- Check all of the screws and retighten if necessary.

- Align the doors flush with the appliance housing using the two oblong holes in the lower bearing bracket if needed. To do this undo the middle screw in the bottom bearing bracket with the T25 tool supplied. Undo the remaining screws a little with the T25 tool or with a T25 screwdriver and align using the slotted holes.
- Support the door: Take off the adjustable foot on the bearing bracket using the open-ended wrench SW10 until it comes into contact with the floor, then turn an additional 90°.

4.3.8 Fit the soft stop mechanism

- Slide the soft stop mechanism on the bearing bracket side at an angle into the slot as far as the limit stop. Fig. 21 (1)
- Slide the unit in fully.
- The unit is positioned correctly when the rib on the soft stop mechanism is in the guide in the housing.
- Tighten the screw with the T15 screwdriver. Fig. 21 (2)

---

* Depending on model and options
Putting into operation

1. Remove the locking device. Fig. 22 (3)
2. Slide on the cover. Fig. 22 (4)

Fig. 22

- Position the bearing bracket and engage. If necessary push apart carefully. Fig. 23 (1)
- Position the panel. Fig. 23 (2)
- Swing in the panel and click into place. Fig. 23 (3)
- Slide on the external cover. Fig. 23 (4)
- Close the upper door. Fig. 23 (5)

4.4 Insertion into a row of kitchen units

The dimensions apply for an opening angle of 90 °. Spacing angles will vary according to the opening angle.

You can purchase a kit to limit the door opening angle to 90° on soft closing appliances. Please contact our customer service team.

The appliance can be built into kitchen units. A top cupboard Fig. 24 (2) can be added above the appliance in order to bring the appliance Fig. 24 (1) up to the height of the fitted kitchen units.

The appliance can be installed right next to the kitchen cabinet Fig. 24 (3). The appliance must stick out by the depth Fig. 24 (B) from the front of the cabinet so that the doors can be opened fully. The appliance may protrude further depending on the depth of the kitchen cabinets and whether wall spacers are used.

**NOTICE**

Danger of overheating due to insufficient air ventilation!
The compressor may be damaged if there is insufficient air ventilation.
1. Take care to ensure adequate air ventilation.
2. Observe the ventilation requirements.

Ventilation requirements:
- Spacer ribs on the back of the appliance provide sufficient air ventilation. In the final appliance position, these must not be placed in recesses or cut-outs.
- There must be a ventilation shaft with the depth Fig. 24 (D) at the back of the top cupboard over the entire width of the cupboard.
- The ventilation shaft Fig. 24 (C) must be observed under the ceiling.
- The larger the ventilation space, the more energy-saving the appliance is in operation.

If the appliance is installed with the hinges next to a wall Fig. 24 (4) the distance Fig. 24 (E) between the appliance and the wall must be observed. This is how far the handle protrudes when the door is open.

4.5 Disposing of packaging

**WARNING**

Danger of suffocation due to packing material and plastic film!
1. Do not allow children to play with packing material.

The packaging is made of recyclable materials:
- corrugated board/cardboard
- expanded polystyrene parts
- polythene bags and sheets
- polypropylene straps
- nailed wooden frame with polyethylene panel*

- Take the packaging material to an official collecting point.

4.6 Connecting the appliance

**WARNING**

Failure to connect properly
1. Fire hazard.
2. Do not use an extension cable.
3. Do not use distributor blocks.

**NOTICE**

Failure to connect properly
1. Damage to the electronics.
2. Do not use a standalone inverter.
3. Do not use an energy saving plug.

A [mm] | B [mm] | C [cm²] | D [mm] | E [mm]
---|---|---|---|---
665 x | 65 | Min. 300 | Min. 50 | Min. 46

* If wall spacers are used, the dimensions increase by 15 mm (see 4.2).

* Depending on model and options
4.7 Switching on the appliance

Ensure that the following conditions are met:
- The type of current and voltage at the installation site correspond to the information on the model plate (see 1).
- The socket is earthed according to the regulations and fused.
- The fuse tripping current is between 10 and 16 A.
- The socket is easily accessible.
- The socket is outside the back of the appliance area in the specified area Fig. 25 (a, b, c).

Check the electrical connection.
Insert the appliance plug Fig. 25 (G) into the back of the appliance. Ensure that it clicks into place.
Connect the power plug to the power supply.
The Liebherr logo appears on the screen.
The display switches to the standby symbol.

4.8 Inserting the FreshAir filter.
The supplied FreshAir filter can be used for optimum air quality. The intake is located at the top of the appliance, (see 1)
Remove cover.

4.9 Setting the clean ventilation grid timer
The ventilation grid must be cleaned at least once a year for sufficient ventilation. The timer can be set as a reminder.
Press menu.
Press the navigation arrows until the ventilation grid is displayed.
Press the ventilation grid symbol.
Press ON.
The timer is set. After the interval has expired a message prompts you to change the ventilation grid.

5 Control

5.1 Changing the temperature unit
The temperature display can be switched from °C to °F.
Press menu.
Press the navigation arrow until °C is displayed.
Press °F.
The temperature is displayed in °F.
Switch from °F to °C in the same way.

5.2 Child proofing
The child-proofing function enables you to make sure that the appliance is not inadvertently switched off by playing children.

* Depending on model and options
5.2.1 Switching on the child safety device
► Press menu.
► Press the navigation arrows until the child safety device is displayed.
► Press ON.
▷ The child safety device is switched on.

5.2.2 Switching the child safety device off
► Press menu.
► Press the navigation arrows until the child safety device is displayed.
► Press OFF.
▷ The child safety device is switched off.

5.3 Sabbath Mode
This function meets the religious requirements on the Sabbath or Jewish feast days. When Sabbath mode is on some of the electronic control functions are switched off. After setting Sabbath mode you no longer need to worry about indicator lamps, figures, symbols, displays, alarm messages and fans. The thawing cycle only works for the specified time without taking account of fridge use. After a power cut the appliance automatically switches back to Sabbath mode.

The internal light is off.

There is a list of Star-K certified appliances at www.star-k.org/ appliances.

WARNING
Danger of food poisoning.
If a power cut occurs during Sabbath mode: If functions such as SuperFrost, SuperCool, ventilation etc. are selected when Sabbath mode is switched on they remain switched on.
- All functions are blocked until Sabbath mode is switched off.
- No audible signals are emitted and the temperature display does not indicate any warnings or settings (such as a temperature alarm or door alarm).
- The internal light is off.

5.3.1 Switching SabbathMode on.
► Press menu.
► Press the navigation arrow until SabbathMode is displayed.
► Press ON.
▷ SabbathMode is switched on. Only the SabbathMode symbol appears on the screen.

SabbathMode switches off automatically after 120 hours if it has not already been switched off manually. The display switches to the home screen.

5.3.2 Switch off the SabbathMode
► Touch the screen.
► Press OFF.
▷ SabbathMode is switched off.

5.4 Refrigerator compartment
Different temperature ranges are set in the fridge compartment because of the natural air circulation. The coldest area is directly above the separating plate between the fridge compartment and the Biofresh area. The warmest area is at the top front and in the door.

5.4.1 Food refrigeration
Note
The energy consumption increases and the cooling performance decreases if the ventilation is inadequate.
► Always keep the air slits of the fan free.
► Place butter and preserves in the upper area and in the door (see 1).
► Use recyclable plastic, metal, aluminium and glass containers and cling film for wrapping.
► Always store raw meat and fish in clean, sealed containers on the bottom shelf of the refrigerator, to prevent them coming into contact with or dripping onto other foods.
► Always store liquids and food which is subject to odour or taste transfer in closed containers or cover them.
► Use the front area of the refrigerator compartment floor only for briefly putting down cooled products, e.g. when rearranging and sorting. However do not leave cooled products there otherwise they may be pushed back or tipped over when the door is closed.
► Do not store food too close together to enable good air circulation.

5.4.2 Setting the temperature
The temperature depends on the following factors:
- the frequency of opening the door
- how long the door is open for
- the room temperature of the installation location
- the type, temperature and quantity of the food

The temperature can be set from 9 °C to 2 °C.
Recommended temperature setting: 5 °C
► Press the fridge compartment field.
▷ The following screen is displayed:

Setting a higher temperature:
► Press plus.
Setting a lower temperature:
► Press minus.
The minus symbol is greyed out when the coldest temperature is selected.
The plus symbol is greyed out if it is pressed again after selecting the hottest temperature. The standby symbol is displayed on the screen.
► Confirm the required temperature with OK.
► The display switches to the home screen.
► The selected temperature is displayed.
► Up or down arrows indicate the change in temperature. The arrows are greyed out when the target temperature is reached.

5.4.3 SuperCool
With SuperCool you switch to the highest cooling performance to reach lower cooling temperatures. Use SuperCool, to rapidly cool large amounts of food.

* Depending on model and options
When SuperCool is activated, the fan* may run. The appliance operates with maximum cooling performance, which means that the noise of the refrigeration unit may be temporarily louder.

The SuperCool function uses slightly more energy.

**Switching on SuperCool**

- Press menu.
- Press the navigation arrow until SuperCool is displayed.
- Press the SuperCool symbol.

The following screen is displayed:

```
Fig. 28

SuperCool

-12h +

START
```

The running time can be set to four levels.

**Setting the running time:**

- Press plus or minus.
- The minus symbol is greyed out when the lowest level is selected.
- The plus symbol is greyed out when the highest level is selected.
- Confirm the required running time with START.
- The display switches to the home screen.
- SuperCool is selected.
- The remaining running time and the SuperCool symbol are displayed in the fridge compartment field.
- The lowered temperature is shown by the down arrows.
- After the remaining running time has elapsed the appliance returns to normal mode. The temperature is set to the preset value again. Up arrows show the temperature increase.

**Switching SuperCool off ahead of schedule**

- Press menu.
- Press the navigation arrow until SuperCool and the remaining running time are displayed.
- Press on the remaining running time.
- Press STOP.

SuperCool is switched off.

The temperature is set to the preset value again. Up arrows show the temperature increase.

**5.4.4 Holiday mode**

The holiday mode saves energy and prevents odour from occurring when the door of the refrigerator compartment stays closed for a lengthy period.

**Switching on the Holiday function**

- Remove all food as otherwise it will spoil.
- Press menu.
- Press the navigation arrow until you see the Holiday function.
- Press ON.

The Holiday function is on.

- The Holiday function symbol appears in the fridge compartment field and the biofresh field.

**Switching off the Holiday function**

- In the fridge compartment field, press the Holiday function symbol.

- The Holiday function is off.
- The temperature is set to the preset value again. Down arrows show the temperature reduction.

**5.4.5 Shelves**

**Moving or removing shelves**

The shelves are prevented from being pulled out accidentally by pull out stops.

- Lift the shelf and pull forward a little.
- Adjust the height of the shelf. To do this move the slots along the supports.
- In order to remove the shelf fully, place it at a slant and pull out towards the front.
- Insert shelf with the raised edge pointing upwards at the back.
- The food does not freeze onto the rear wall.
- Food is prevented from falling out.

When storing and removing food on the top shelf, please pay attention to the fold-out interior lighting.

**Dismantling shelves**

- The shelves can be dismantled for cleaning.

**5.4.6 Using the sectioned shelf**

**Adjusting the height:**

- Pull the glass plates out forwards one by one.
- Remove the support from the catch mechanism and click into place at the required height.

**Using both shelves:**

- Lift the top glass plate and pull the bottom glass plate forwards.

**5.4.7 Using adjustable bottle shelf**

At the base of the refrigerator compartment, the integrated bottle shelf or alternatively the glass shelf can be used:
Using the bottle shelf: to save space, store the glass shelf under the bottle shelf.
Place the bottles with the base pointing backwards facing the rear wall. If the bottles project beyond the bottle shelf:
set the lower door rack one position higher.

5.4.8 VarioSafe
The VarioSafe provides space for small items of food and packages, tubes and jars.

Using VarioSafe

![Image](image1)

The VarioSafe drawer can be taken out and pushed in at two different heights.
The VarioSafe can also be height-adjusted as a whole.

To remove them completely, set them at an angle and pull towards you.

Dismantling VarioSafe

![Image](image2)

The VarioSafe can be dismantled for cleaning.

5.4.9 Door racks

Moving the storage rack

![Image](image3)
The boxes can be removed and placed on the table as a single unit.

Either one or both the boxes can be used. If particularly tall bottles are to be stored, hang only a single box above the bottle rack.

Re-positioning the boxes: Lift them for removal and re-position them as required.

Note
Food items in the upper door area that are too tall can lead to contact with the interior lighting.
When closing the door, take care to ensure that the lid of the package rack is closed, or that when food is stored on the upper door rack a distance of 30 mm to the appliance ceiling is maintained.

Dismantling door racks

![Image](image4)

* Depending on model and options
5.4.10 Using the bottle holder

To avoid the bottles tipping over, push the bottle holder along.

5.5 BioFresh compartment

In the BioFresh section, certain fresh foods can be kept fresh for longer compared to conventional cooling methods.

For food with an indicated best before date, the date specified on the packaging applies.

If the temperature falls below 0 °C, foodstuffs can freeze.

5.5.1 DrySafe

The DrySafe is suitable for storing dry or wrapped food (e.g. dairy products, meat, fish, sausages). A relatively dry storage climate is established here.

5.5.2 HydroSafe

The humidity in the compartment depends on the moisture content of the items being stored and the number of times the door is opened. You can set the humidity yourself.

On the high moisture setting, the HydroSafe is suitable for storing loose salad, vegetables and fruit with a high moisture content. A well-stocked drawer is stored in absolute freshness.

5.5.3 Setting the humidity in the HydroSafe

- Low humidity: Move the slide control to the left.
- High humidity: Move the slide control to the right.

5.5.4 Storing food

Note

- Do not put the following in the BioFresh section: cold-sensitive vegetables including cucumbers, aubergines, tomatoes, courgettes and any cold-sensitive tropical fruits.

To prevent food spoilage due to transfer of germs: Store unwrapped animal and vegetable products separate from one another in the drawers. This also applies to different sorts of meat.

If food has to be stored together due to lack of space:
- wrap the food.

### 5.5.5 Storage times

<table>

5.5.6 Setting the temperature in the BioFresh compartment.

Recommended refrigerator setting: 5 °C. The BioFresh temperature is controlled automatically and is between 0 °C and 3 °C. The temperature can be set slightly colder or slightly warmer. The temperature can be set from level 1 (lowest temperature) to level 9 (highest temperature). The default setting is level 5. With levels 1 - 4 the temperature can drop to below 0 °C so that the food can freeze.

- Press menu.
- Press the navigation arrow until BioFresh is displayed.
- Press the minus symbol or plus symbol.
- The following screen is displayed:

![Fig. 36](image)

- Setting the level: Press plus or minus. The minus symbol is greyed out when the lowest level is selected. The plus symbol is greyed out when the highest level is selected.
- Confirm the required level with OK.
- The display switches to the home screen.
- The BioFresh temperature is changed to the new value.

5.5.7 Drawers with cushioners

- Pull out the drawer, lift it at the back and draw it forwards for removal.
- Push the rails in again!

![Fig. 38](image)

- Push the rails in.
- Attach the drawer and push it in until it engages audibly at the back.

5.5.8 Humidity control plate

- To remove the humidity control plate: Having removed the drawers, carefully draw the plate forwards and lower it for removal.
- Inserting the humidity control plate: Insert the plate from below into the front and back bracket and push back until it clicks into place.

6 Maintenance

6.1 Change the FreshAir filter.

The FreshAir filter guarantees optimum air quality. It should be changed every 12 months. When the timer is set a message on the display prompts you to change it. The FreshAir filter can be ordered from the specialist dealer.

- Press the change FreshAir filter symbol
- The display switches to the home screen.
- The message can be displayed again by pressing on the menu field until the filter has been changed and confirmed. (see 8)

![Fig. 40](image)

- Remove cover.
6.3 Cleaning the ventilation grid

The ventilation grid ensures that the appliance works properly due to optimum aeration and ventilation.

- Clean the ventilation grid regularly with a vacuum cleaner.
- Remove stubborn stains with a soft cloth.

8. Risk of damage from stainless steel care products!
The stainless steel doors and stainless steel side panels are treated with a premium surface finish.

- Do not use any cleaning agents in concentrated form.
- Do not use any scouring or abrasive sponges or steel wool.
- Do not use any sharp or abrasive cleaning agents, nor any that contain sand, chloride or acid.
- Do not use chemical solvents.
- Do not damage or remove the type plate on the inside of the appliance.
- Do not pull off, bend or damage cables or other components.
- Do not allow any cleaning water to enter the drain channel, ventilation grille or electrical parts.
- Please use soft cleaning cloths and a universal pH-neutral cleaning agent.
- Please use cleaning and care products suitable for contact with foodstuffs in the appliance interior.

6.4 Cleaning the appliance

Clean the appliance regularly.

**WARNING**
Risk of injury and damage as a result of hot steam!
Hot steam can lead to burns and can damage the surfaces.

- Do not use any steam cleaners!

**NOTICE**
Incorrect cleaning damages the appliance!
- Do not use cleaning agents in concentrated form.
- Do not use any scouring or abrasive sponges or steel wool.
- Do not use any sharp or abrasive cleaning agents, nor any that contain sand, chloride or acid.
- Do not use chemical solvents.
- Do not damage or remove the type plate on the inside of the appliance. It is important for the customer service.
- Do not pull off, bend or damage cables or other components.
- Do not allow any cleaning water to enter the drain channel, ventilation grille or electrical parts.
- Please use soft cleaning cloths and a universal pH-neutral cleaning agent.
- Please use cleaning and care products suitable for contact with foodstuffs in the appliance interior.

- Empty appliance.
- Pull out the power plug.

- Clean plastic outer and inner surfaces with lukewarm water and a little washing-up liquid.
- Only use a soft clean cloth to wipe side walls with a paint finish. In the case of heavy soiling, use lukewarm water with neutral cleaning agent.*

**NOTICE**
Risk of damage from stainless steel care products!
The stainless steel doors and stainless steel side panels are treated with a premium surface finish.

- Do not treat the lettering on the painted door surfaces with harsh, abrasive agents. Wipe off any dirt with a soft cloth and some water or neutral cleaner.*
- Most of the parts can be dismantled for cleaning: see the relevant chapter.
- Clean drawers by hand with lukewarm water and a little washing up liquid.
- All the other fittings can be put in the dishwasher.
- Only use a damp cloth to clean the telescopic rails. The grease in the runners is for lubrication purposes and must not be removed.

**After cleaning:**
- Wipe dry the appliance and items of equipment.

* Depending on model and options
6.5 Customer service

First of all check whether you can eliminate the fault yourself. (see 7) If you can’t, contact Customer Services. You can find the address in the enclosed customer service list.

! WARNING

Risk of injury if repair work is not carried out professionally!

If you can’t correct the following faults yourself: (see 6)

- Have any repairs and action - not expressly specified - on the appliance and mains cable carried out by service personnel only.

Displaying the appliance description (model and index), service no. (service) and serial no. (S. no.) on the screen:

- Press menu.
- Press the navigation arrows until the appliance information symbol is displayed.
- Press the appliance information symbol.
- The appliance information is displayed.
- Note down the appliance information.
- To return to the home screen press the Back symbol.

- Close the door.
- Contact customer service and give them the required appliance information.
- This will help us to provide you with a faster, more accurate service.
- Follow any further instructions given by Customer Services.

Alternatively you can read off the appliance information from the model plate:

- Read off the appliance name Fig. 42 (1), service no. Fig. 42 (2) and serial no. Fig. 42 (3) from the model plate. The model plate can be found on the inside of the appliance on the left.

Licence agreements:

Licences used can be viewed at ©.
- Press ©.

7 Malfunctions

Your appliance is designed and manufactured for a long life and reliable operation. If a malfunction nonetheless occurs during operation, check whether it is due to a handling error. In this case you will have to be charged for the costs incurred, even during the warranty period. You may be able to rectify the following faults yourself:

Appliance does not work.

- The appliance is not switched on.
- Switch on the appliance.
- The power plug is not properly inserted in the wall socket.
- Check power plug.

- The fuse of the wall socket is not in order.
- Check fuse.
- The appliance plug does not fit the appliance properly.
- Check the appliance plug.

The compressor runs for a long time.

- The compressor switches to a low speed when little cold is needed. Although the running time is increased as a result, energy is saved.
- This is normal in energy-saving models.
- SuperCool is activated.
- The compressor runs for longer in order to rapidly cool the food. This is normal.

Excessive noise.

- Due to the various speed steps, speed-regulated* compressors can generate different running noises.
- The sound is normal.

A bubbling and gurgling noise.

- This noise comes from the refrigerant flowing in the refrigeration circuit.
- The sound is normal.

A quiet clicking noise.

- The noise is produced whenever the refrigeration unit (motor) automatically switches on or off.
- The sound is normal.

A hum. It is briefly a little louder when the refrigeration unit (the motor) automatically switches on.

- The refrigeration increases automatically when the SuperCool function is activated, fresh food has just been placed in the appliance or the door has been left open for a while.
- The sound is normal.
- The ambient temperature is too high.
- Solution: (see 1.2)

A low hum.

- The sound is produced by air flow noise of the fan.
- The sound is normal.

Vibration noises

- The appliance is not standing firmly on the floor. As a result objects and adjacent units start to vibrate when the refrigerator is running.
- Align the appliance using the adjustable feet.
- Keep bottles and jars apart.

Flow sound at the soft stop mechanism.

- The noise is produced when the door is opened and closed.
- The sound is normal.

The DEMO symbol appears on the screen. In addition some time elapses.

- DEMO mode is activated.
- OFF Press .

DEMO is displayed in the top right corner of the screen.

- DEMO mode is activated.
- Unplug the appliance.
- Plug the appliance in again.
- The DEMO symbol appears on the screen. In addition some time elapses.
- OFF Press .

The outer surfaces of the appliance are warm*.

- The heat of the refrigeration circuit is used to prevent condensate from forming.
- This is normal.

The temperature is not cold enough.

- The door of the appliance is not properly closed.
- Close the door of the appliance.
- Insufficient ventilation.

* Depending on model and options
Messages

Keep ventilation grille clear, and clean it.
→ The ambient temperature is too high.
▶ Solution: (see 1.2).
▶ The appliance was opened too frequently or for too long.
▶ Wait to see whether the appliance reaches the required temperature by itself. If not, please contact the after sales service (see 6).
▶ The temperature is incorrectly set.
▶ Set the temperature to a colder setting and check after 24 hours.
▶ The appliance is too close to a source of heat (stove, heater etc).
▶ Change the position of the appliance or the source of heat.

The internal light does not come on.
→ The appliance is not switched on.
▶ Switch the appliance on.
▶ The door was open for longer than 15 minutes.
▶ The internal light switches itself off automatically after about 15 minutes if the door is open.
▶ The LED illumination is faulty or the cover is damaged:

WARNING
Risk of injury due to electric shock!
Live parts are located under the cover.
▶ Have the LED interior light changed or repaired only by the customer service or by specialized personnel trained for the purpose.

WARNING
Danger of injury by LED lamp!
The light intensity of the LED lighting corresponds to risk group RG 2.
If the cover is defective:
▶ Do not look into the illumination with optical lenses from the immediate proximity. This can cause injury to the eyes.

The door seal is defective or needs to be replaced for another reason.
→ The door seal can be replaced. It can be replaced without the need for special tools.
▶ Contact Customer Service (see 6):

The unit has iced up or condensation has formed.
→ The door seal may have also slipped out of its groove.
▶ Check to ensure that the door seal is seated properly in the groove.

8 Messages

Error messages and reminders are displayed by an audible signal and a message on the screen. The audible signal gets louder and louder when error messages appear. It only stops when the message is confirmed. Highest priority messages are displayed first if several occur at the same time. Each message must be cleared separately.

The message stays in the menu field as long as it is active or the fault is not eliminated.

Note
Details on the message can be displayed again via the menu field.
▶ Press menu.
▶ Press the message symbol.
▶ The display switches to the next message when you press one. After the last active message the display switches to the home screen.

Door alarm
An audible warning sounds if the door is open for longer than 60 seconds. The door alarm symbol appears on the display. The audible warning stops automatically when the door is closed.

The audible warning can be switched off when the door is open. The audible alarm is switched off while the door is open.
▶ Press the door alarm symbol.
▶ The door alarm stops.
▶ The display switches to the home screen.
▶ Close the door.

Appliance faults
An audible warning sounds. The appliance fault symbol appears on the display with the relevant error code.

An appliance component indicates a fault.
▶ Open the door.
▶ Note down the fault code.
▶ Press the appliance fault symbol.
▶ The audible signal stops. The display switches to the home screen.
▶ Close the door.
▶ Contact Customer Services (see 6).

Other messages

FreshAirChange filter (see 6)

Clean the ventilation grille (see 6)

9 Decommissioning

9.1 Switching the appliance off

Note
If the appliance cannot be switched off, the child safety device is enabled.
▶ Switch the child safety device off (see 5.2.2).

9.1.1 Switch off the appliance from the menu

The whole appliance is switched off. The screen goes black.
▶ Press menu.
▶ Press the navigation arrows until the standby symbol is displayed.
▶ Press OK.
▶ The standby symbol flashes on the whole screen. The whole appliance is switched off.
▶ After 10 minutes the standby symbol goes out.

9.1.2 Switching the appliance off via the fridge compartment field.

The biofresh compartment automatically switches off when the fridge compartment is turned off. The screen remains on.

* Depending on model and options
The screen remains on.
- Press the fridge compartment field.
- Press plus.
  ▶ The plus symbol is greyed out if it is pressed again after selecting the hottest temperature. The standby symbol is displayed on the screen.
- Press OK.
  ▶ The standby symbol is displayed in the fridge compartment and BioFresh compartment fields.
  ▶ The appliance is switched off and the screen remains switched on

9.2 Taking the appliance out of service
- Empty the appliance.
- Switch off the appliance (see 9).
- Remove mains connector.
- Remove appliance connector if required: Remove and move from left to right at the same time.
- Clean the appliance (see 6.4).
- Leave the door open to prevent odour.

10 Disposing of the appliance

The appliance contains some reusable materials and should be disposed of properly - not simply with unsorted household refuse. Appliances which are no longer needed must be disposed of in a professional and appropriate way, in accordance with the current local regulations and laws.

When disposing of the appliance, ensure that the refrigeration circuit is not damaged to prevent uncontrolled escape of the refrigerant it contains (data on type plate) and oil.
- Disable the appliance.
- Pull out the plug.
- Cut through the connecting cable.

* Depending on model and options
Disposing of the appliance

* Depending on model and options
