<sup>1</sup> These models are only bound for storing wine. Maximum DIN norm bordeaux bottles capacity (0.75 l) as per norm NF H 35-124 (H: 300.5 mm, Ø 76.1 mm)

## Features

### Door alarm

The audible door alarm alerts the user if the door has been open for longer than 60 seconds for safe protection of the food.

### Child lock

The child lock is programmed so as to prevent the appliance being inadvertently switched off. A symbol in the MagicEye indicates when the child lock is switched on.

### Reversible door hinges

It is possible to change the door hinge on the appliance. The reversible door hinges permit optimum use of the appliance wherever it is located.

### Wine storage cabinets

Wine storage cabinets provide similar conditions to wine cellars. A constant temperature prevails throughout the interior in these appliances. It can be set to between +5 °C and +20 °C as required. Wine storage cabinets are ideal for the long-term storage and maturing of wines. Depending on the set temperature, these appliances can however also store more ample stocks of wine at serving temperature. In the GrandCru and Vinothek series, Liebherr offers multi-temperature wine cabinets in different sizes and with different features.

### Activated charcoal filter

Environmental odours can affect wines stored for longer periods. In the wine cabinets, perfect air quality is ensured through an easily-replaceable FreshAir activated charcoal filter.

### Presentation shelves

The presentation shelf sets off fine wines to perfection and keeps bottles that have already been opened at the optimum temperature. Up to 6 wine bottles can be placed upright on the flexible shelf. Wine bottles can be stored lying down either behind or at the side.
