### BluPerformance

Offering even more interior capacity for food storage, economy and energy efficiency, quiet operation, ease-of-use and exceptional design: Liebherr's BluPerformance appliances set both a new direction in refrigeration and freezing, and new benchmarks.

### BioFresh

In the BioFresh compartments food retains its healthy vitamins, aroma and appetising appearance significantly longer than in a conventional fridge. Through its advanced technology the temperature is accurately kept at just above 0 °C.

### NoFrost

The NoFrost system from Liebherr provides rapid, fan-assisted, frost-free freezing for the safe, longterm storage of food. The NoFrost technology creates a much larger storage capacity and keeps the freezer constantly frost-free.

### IceMaker with water tank

The IceMaker with water tank is an innovative solution if the piped water is of inadequate quality or is unavailable. The tank is removable for conveniently replenishing the water.

### IceMaker with fixed water connection

The plumbed-in IceMaker automatically keeps you topped up with the finest quality ice cubes so that you are prepared for every occasion.

### DuoCooling

DuoCooling uses two completely separate refrigeration circuits to ensure no air is exchanged between the fridge and freezer compartments. The food neither dries out nor is odour transferred. This means throwing less away, shopping less often, but saving more and greater enjoyment.
