Global success: The Liebherr Group.

Liebherr is a third-generation, family-owned company founded in 1949 by Hans Liebherr with his ground-breaking invention of the world's first mobile tower crane.

With over 70 years of success, Liebherr is known as a pioneer in high-quality, breakthrough innovations and countless cutting-edge technologies in numerous industries. One of the world's largest manufacturers of construction machinery, Liebherr has expanded its broadly diversified portfolio to 13 product segments including earthmoving, deep foundation machines, mobile and crawler cranes, tower cranes, concrete technology, material handling technology, mining, maritime cranes, aerospace and transportation systems, gear technology and automation systems, components, hotels and refrigeration and freezing. The company currently employs about 48,000 people in more than 140 companies in over 50 countries worldwide.

Refrigeration and freezing

Liebherr-Hausgeräte GmbH, Germany

Liebherr-Hausgeräte – Specialists in refrigeration and freezing.

Liebherr-Hausgeräte covers the full range of refrigeration and freezing for domestic and commercial use. Headquartered in Germany, Liebherr-Hausgeräte has an impressive range of more than 3,000 products in its portfolio.

Before we think about fridges, we think about you.

Fridges are supposed to cool. But what else should modern appliances be capable of today? How can they better meet customer needs? How can their design be more efficient, intuitive and modern?

We think about all these questions every day, because for us a fridge is not just an appliance. Instead, it should be a partner who supports us where it can … who thinks in harmony with us, takes on tasks and makes work easier. In order to achieve this, we are constantly developing our appliances. Because the smarter and more helpful they are, the more time you have for all the other important things in life.

Achieving the highest quality is our standard.

We have been manufacturing high-quality fridges and freezers and selling them around the world since 1954. Yet at heart we are still a family business and have our roots firmly based in Germany. We continue to develop our products here. German engineering – from an enduring connection with our founder and in the knowledge that engineering expertise has been pooled here for generations.

Built to last.

You can experience our quality standards in the smallest of details. For example, before a door hinge is approved by us, it must pass through at least 100,000 opening cycles. This corresponds to a usage period of more than 15 years. We also test all other functional parts to ensure that they can last just as long. We have leveling bars to ensure that your fully integrated appliance works perfectly over this long period and stands firmly in place, even when the wood in the kitchen unit settles. They harmoniously compensate for any unevenness between the floor and the appliance, so that the fridge door always closes tightly. It may sound simple, but this is crucial for avoiding condensation and increased energy consumption.

And if, contrary to expectations, a small detail no longer meets your requirements, you or your expert service partner can usually correct it quickly, because all of our appliances are extremely easy to repair. We keep all essential spare parts in stock for well over 10 years. This saves you money for minor repairs or the purchase of a new appliance – and it is also sustainable.

We don’t just say it. We also guarantee it.

During production, we take a very close look at all of our fridge components and test them far more thoroughly and more often than required by law – right up until the packaging stage. Only then may our appliances take a little rest. All our production sites are certified according to international ISO 9001 standard for quality and ISO 14001 standard for environmental management. Therefore it is wholly natural for us to guarantee you that for at least two years our products will be free of material and manufacturing defects and are particularly easy to install. With WarrantyPlus, you can easily extend this warranty for up to 10 years.

One thing is certain in any case: Your Liebherr will be a reliable companion for a very long time.

GERMAN ENGINEERING

Taste that stands the test of time: Freshness is a question of technology.

Storing groceries in ideal climatic conditions not only ensures extralong freshness and storage time, it also makes a substantial contribution to avoiding food waste. With our appliances this is possible – thanks to the perfect combination of integrated freshness technologies.

Duo Cooling

DuoCooling. No drying out.

Our basic technology in all fridge-freezers is called DuoCooling. Thanks to two completely separate refrigeration circuits, it ensures that there is no exchange of air between the fridge and freezer compartments. The food neither dries out nor are odours transferred – so that only the Camembert smells and tastes like Camembert.

Easy Fresh

EasyFresh. Ideal for fruit and vegetables.

The freshness guarantee in your Liebherr fridge. Unpacked fruit and vegetables feel right at home here. At the same temperature as in the fridge compartment and air-tight, lettuce, for example, remains crisp and fresh even after 10 days.

Bio Fresh

BioFresh. Our all-rounder.

With the proven BioFresh technology, food is stored at a much cooler temperature than in the rest of the appliance. At temperatures just over 0°C and with perfect humidity, BioFresh offers the ideal storage conditions. The air-tight Fruit & Vegetable safe is the ideal environment for fresh produce. Meat, fish and dairy products are in good hands in the Meat & Dairy safe.

Bio Fresh Professional

BioFresh Professional. Refrigerate like the professionals.

A special innovation can be found in BioFresh Professional and the brand new HydroBreeze feature. Every time the door is opened and after every 90 minutes, a fresh, cold mist is produced, which covers the fruit and vegetables like a balm. The mist ensures crisp freshness and improves the structure – coating the fruit and veg with a special wow effect.

Fresh. Sustainable. Healthy.

The storage climate: We could write so much about it. To put it briefly, there are three main reasons that motivate us to keep perfecting it. First: An ideal climate contributes to keeping your food fresh for longer. You can enjoy it fresh for longer. Second: This prevents unnecessary food waste and means you have to go shopping less frequently. Three: Optimal storage helps to protect vitamins and nutrients. And this contributes to a healthy diet.

HydroBreeze – the cold fresh mist.

We found inspiration for the HydroBreeze in Salinas Valley in California. Due to the proximity to the cool Pacific Ocean, in the summer a fine humid mist covers the valley and the fields. This prevents the vegetables grown here from drying out.

Hydro Breeze

Fits exactly to your needs.

Fridges and freezers are used daily. They have long been an essential part of our lives. And they should be as simple to use and convenient for you as possible. That’s why we develop fully integrated appliance that impress with their ease of use, clarity and flexibility – from the first door opening to the smallest features. In this way they adapt perfectly to meeting your needs.

Life is a request show.

The features of the new fully integrated appliance give you more freedom: The divisible glass shelf, with its effortless one-handed operation, creates space for tall containers and carafes.

Do you like things to be well organised? With the VarioBox and the VarioSafe you can store smaller objects neatly in the door or interior – always exactly at the height you like.

How about a cold drink? The glass shelf above the BioFresh safe transforms into a bottle shelf in the blink of an eye. The freezer compartment also ensures you are well prepared with an appliance from our new fully integrated series:

VarioSpace creates space for the largest turkey or the highest ice cream cake. Speaking of cake: For all those who love baking, our fridges and fridge-freezers offer enough space for a full baking tray.

Full of food. And convenience.

To ensure that all your food is always perfectly accessible, our appliances have telescopic rails in the fridge and freezer compartments which enable the drawers to slide back and forth with ease. And even once you have found all the ingredients, there is still further convenience with thanks to the SoftSystem. This means that our doors always close gently and quietly, even if the force applied is a little too strong.

Timeless and elegant. Design for every kitchen.

Hidden behind the panels of your integrated kitchen, your Liebherr is inconspicuous and lets the design of the kitchen take the spotlight. But once you open it, it’s immediately apparent that behind the door lies something very special.

Design meets functionality.

Puristic and timeless on one hand. Elegant and exclusive on the other. The new design language blends seamlessly into any interior: The high quality glass and stainless steel components are impressive. The precise craftsmanship, an eye for detail and the harmonious combination of materials, shapes and colours create an aesthetically pleasing whole. This is subtly highlighted by the new lighting concept, LightTower.

The new LightTower lighting concept evenly illuminates the interior while supporting the glass shelves. Flexible, space-saving, unique.

Just a fan? Not at all: the new fan with ambient lighting ensures almost uniform temperature distribution and also includes the FreshAir activated charcoal filter. Functionality at its best.

Perfectly balanced: a powerful, complete package.

A good fridge is a real all-rounder: In addition to low power consumption and low noise levels, it should also offer plenty of space for food and have power reserves for when they are needed. For this reason we don't pay attention to just one factor, instead we have all usage situations in mind at once. The result: our appliances offer a balanced, perfectly coordinated complete package of energy efficiency, capacity, noise level and cooling performance. So all good things come in fours for us.

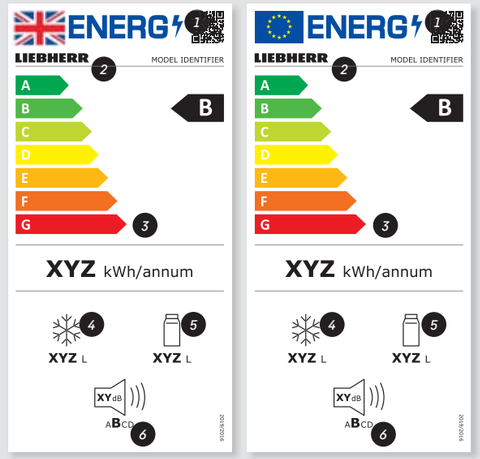
Energy efficiency
Our new fully integrated appliances occupy top positions in efficiency rankings. In this way, they protect the precious resources of our environment and, thanks to low electricity costs, your wallet too.

Capacity
We have the perfect appliance for all family sizes, lifestyles and niche heights. From extra-large drawers to the smallest details, we make sure that no litre of capacity goes to waste. For example, through space-saving lighting solutions recessed into the housing.

Noise level
Kitchen and living spaces are merging more and more in modern home design concepts. This underlines the importance of particularly quiet fridges. Our new fully integrated range therefore offers a wide selection of extremely quiet appliances. Some even achieve the ultra-quiet level of 29 dB.

Refrigeration
Intelligent sensor technology constantly adapts the cooling performance to the current use – our fully integrated appliances are very energy-efficient and economical in everyday use. At the same time, they offer considerable power reserves. For example, to cool a larger amount of food after the weekly shop and they are especially good for spontaneous visits. Drinks can be brought to a pleasant drinking temperature extremely quickly at the touch of a button.

The new energy label for electrical appliances.



1 The QR code for identifying the product in the EPREL (European Product Database for Energy Labeling) EU database.

2 The model identifier for identifying the product manually in the EPREL EU database, e.g. via the article number.

3 The new A to G efficiency scale. However G is only intended for wine cabinets.

4 The sum of the volumes of the frozen compartment(s).

5 The sum of the volumes of the chill compartment(s) and the unfrozen compartment(s).

6 The noise level is now also classified into classes A to D.

The label for Great Britain includes the Union Jack.

It is now once again possible to distinguish more easily between efficient and inefficient appliances. With the reform of the energy label, appliances will once again be rated from A to G on the efficiency scale. This will make things much clearer for you in future.

**Technology is developing all the time.
And we also never stand still.**

We are constantly working on features that make everyday work easier, optimise storage and reduce energy. We were one of the first manufacturers in Europe to develop fridges and freezers in the highest efficiency class. And that is also our aim for the future. Fridges and freezers work around the clock and are responsible for up to 15 percent of the electricity bill. As our appliances consume less energy, they make an important contribution to climate protection.

We are already providing what the future will bring.

One thing is clear: Technology will get smarter and smarter in the future. But does a fridge need to be intelligent? It doesn't have to be. But we believe: Another cool head in the household can't do any harm. Thanks to many smart functions, our appliances have proven themselves to be reliable helpers behind the scenes.

Integrating progress.

Your fridge thinks for you whenever it can. For example, it reminds you of forgotten drinks in the freezer – thanks to the integrated BottleTimer. So burst bottles are a thing of the past.

When you're on holiday, simply switch your fridge to HolidayMode. That way you can save a lot of energy.

And especially interesting for all those who are also drawn to the fridge at night: NightMode. The interior is then only illuminated with a dimmed light. So after a midnight snack, you can go back to bed quickly and are guaranteed not to fully wake up from your slumbers.

Learn how digitally networked refrigeration makes your everyday life easier:
home.liebherr.com/shop/en/gbr/

You can download the SmartDevice app here:

Download on the App Store

GET IT ON Google Play

Always perfectly networked.

All our new fully integrated models are either networked during production or can be subsequently connected to WiFi via the SmartDeviceBox.

This way you benefit from the many new possibilities of our SmartDevice app and connecting your fridge to an existing smart home environment. This allows you to easily control appliances via online services like IFTTT.

Thanks to networking, important status messages are also sent directly to your mobile phone. For example via DoorAlarm, if the fridge door is left open. But our SmartDevice app has even more to offer: You will also find helpful storage tips, access to operating instructions, warranty extensions, accessories and much more.

In short, our appliances make you ready for tomorrow today.

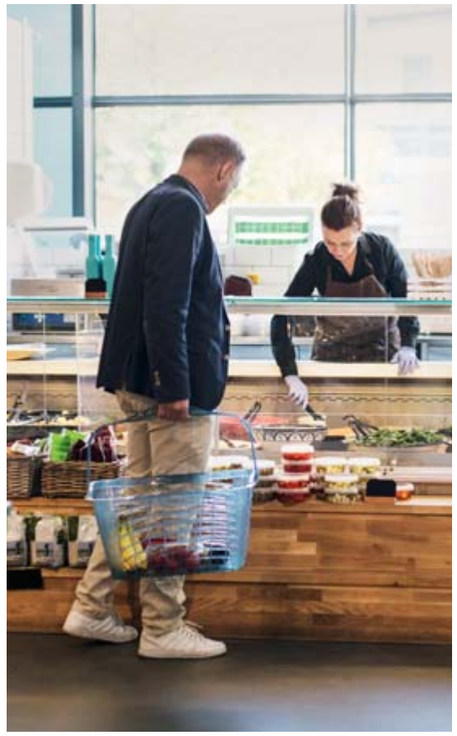
Works with IFTTT

We play it very, very safe.

We take data protection very seriously. For this reason we have chosen a software partner who shares our high standards: Microsoft, as the first leading provider of cloud services, is certified in accordance with the international standard ISO/IEC 27018, which regulates data protection, and uses AES-256 – the same encryption technology employed in the banking sector.

The kitchen becomes a market stand: with the new OpenStage drawers.

Now there’s a clear view of everything: With the transparent OpenStage drawers we are setting new standards in ease of use and design. Inspired by display cases in fine delicatessens, the OpenStage concept showcases all your food at a glance. The drawers are reminiscent of market stands and present the complete contents of the fridge in an optimally clear and ergonomically ideal way.



You can store a large number of drinks in the practical drawers and remove them easily. High-quality railings ensure stability. When closing the drawers you will also enjoy the highest level of convenience, thanks to the gentle self-closing mechanism.

The captivating design has a full stainless steel panel on the rear wall and in the interior door as well as a fan with discreet ambient lighting. In this way, you will feel something special every time you open the door.

It’s raining ice cubes. Automatically.

Spontaneous party? Not a problem. The IceMaker produces up to 130 ice cubes a day, providing plenty of ice for aperitifs, cocktails and soft drinks – for a truly memorable summer garden party. With the MaxIce feature, you can further speed up ice cube production if you have invited lots of guests over.

Flexible installation.

The IceMaker is available with a direct connection to the drinking water supply. If such a connection is not available, there are also models with a water tank in the fridge compartment. So you can enjoy convenient ice cube production even without a fixed tap water connection.

This spring has its source in the fridge.

Our InfinitySpring brings a crystal-clear source of water into the heart of your kitchen. Because water is healthy. Now lugging heavy crates and plastic bottles full of water are history. This means less strain on your back and also has our environment in mind. Simple and sustainable.

Ice-cold water on tap with no heavy lifting.

The flush-mounted water dispenser is always there when it is needed and almost invisible when its not. It is suitable for containers of almost any size, also for carafes or bottles for the water carbonator. The integrated filter system ensures perfect water quality. By the way, in contrast to conventional table water filters, it only needs to be replaced every six months.

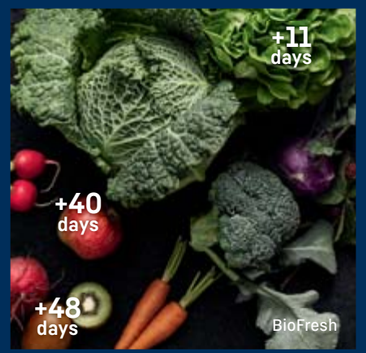
For a clear overview. Even before you open the fridge.

○ Pure ◊ Plus ⬡ Prime △ Peak

Which appliance is right for me?
This customer question is not always easy to answer.
That’s why we have made things even simpler by
dividing our product range into four easy to understand Series.

○ Pure Series

The Pure Series is our basic class. Simple, clear and perfectly equipped for all essential needs. Appliances in the Pure Series are stripped down to the essentials. But full to the brim with the highest level of Liebherr quality.



◊ Plus Series

The Plus Series builds on our Pure Series and has many impressive additional details. Above all, plus means a plus in comfort. The appliances not only provide first-class refrigerating and freezing, they are also just that little bit smarter. They help make much of the handling a little easier.

⬡ Prime Series

With the Prime Series things get much more classy. It makes an unmistakable mark in terms of design and material. Above all, genuine materials are used inside the appliances, such as stainless steel. But also special lighting solutions make the appliances in this Series particularly appealing.

△ Peak Series

The Peak Series sits at the top of our Series. This combines the best with the best. There is no compromise. Innovative Liebherr technology meets high-end design and comfort solutions that are simply the best in its class. Appliances in this Series are for those who want everything.

Flexible accessories for your appliance.

Get more from your Liebherr appliance with our range of accessories.

Lifestyle features

Our butter dish offers space for a wide variety of butter sizes and fits perfectly into all shelves. The easy-to-fill ice cube tray is non-spill. Saving energy made easy: With the Vario energy-saving panel, you can reduce the energy consumption of your NoFrost freezer by up to 30% when you are not using all drawers.

Organisational systems

Set up your fridge how you want it:
In addition to the VarioSafe and the VarioBoxes, to leave room on the shelves for larger items, we have solutions for loose produce such as the 2in1 egg tray and the FlexSystem. Or personalise your wine cabinet with our bottle shelves, presentation shelves and clip on labelling.

Perfect installation – perfect appearance

Connecting sets, stainless steel frames and fronts with matching handles or drawers for accessories: the product range features many accessories that can help integrate a fully integrated appliance in the kitchen in an individual and visually perfect fashion.

Accessories and Consumables

Matching accessories and consumables such as FreshAir filters for your appliance can be purchased through our shop:
https://home.liebherr.com/shop/en/gbr/

Creating an individually designed Food and Wine Centre.

Liebherr appliances designed for incorporation into our Side-by-Side food centres feature an integrated heating system in their ceiling and/or side walls. This heating prevents condensation forming between appliances running at 0 °C and colder – especially if there is a large temperature differential, as with a fridge and freezer.

Different Liebherr appliances can be combined in the food and wine storage (horizontally and vertically) without problems, with both the appliances and kitchen furniture being fully protected against condensation.

Fridge-freezers

ICNd 5153

Combined refrigerator-freezer for integrated use

Quality down to the finest detail

EasyFresh

The guarantee of market freshness in the home is our EasyFresh-Safe. Whether it's unpackaged vegetables or fruit, this ensures optimal storage for everything. Thanks to the air-tight closure, the food causes the humidity in the safe to rise. This keeps the food fresh for a long time.

SuperSilent

Shhh – listen carefully. Your Liebherr is so quiet that you have to strain your ears to hear it. How is this achieved? All refrigeration components such as compressors, valves, fans and evaporators are optimised and perfectly adapted to one another. This means you only hear what you want to hear in your kitchen.

IceMaker

Are there any ice cubes left? An IceMaker means you never have to ask. With the IceMaker with fixed water connection, the water comes directly from the tap. The MaxIce function allows you to produce up to 1.5 kg of ice cubes a day. The ice cube separator helps to divide the drawer into any size you want – for example, ice cubes on the left, ice cream on the right – or just for ice cubes.

NoFrost

When you open your freezer, you want to see frozen food – and certainly not ice and frost. NoFrost protects the freezer compartment from unwanted icing, which consumes a lot of energy and can be expensive. NoFrost means no more tedious and time-consuming defrosting of the freezer compartment, more time for other things – and saving money.

BioFresh Professional

Do you want to cool fruit and vegetables like professionals? You'll be inspired by HydroBreeze. The cold mist combined with a temperature in the safe of around 0 °C gives food that extra a boost for longer shelf life. And it creates a genuine visual wow effect. HydroBreeze is activated every 90 min. for 4 seconds and for 8 seconds when the door is opened.

DuoCooling

DuoCooling uses two completely separate refrigeration circuits to ensure no air is exchanged between the fridge and freezer compartments. The food neither dries out nor is odour transferred. This means throwing less away, shopping less often, but saving more and greater enjoyment.

LED freezer compartment lighting

The LED freezer compartment lighting ensures your freezer drawers are pleasantly lit. This makes it even easier for you to find the food you want. The energy-efficient LED unit is elegantly positioned above the drawers to save space.

LightTower

Enjoy an optimally illuminated interior: the LightTower shows off the food in its best light and is positioned so that all of your filled fridge is illuminated at all times. The flush mounting of the LightTower in the side walls means there is also more space for your food.

FlexSystem

Small and delicate fruit in the refrigerator can easily roll out of sight or become crushed. That's why your Liebherr comes with the FlexSystem. Two flexibly positionable boxes in the BioFresh safe ensure everything is clearly arranged and organised. And they also safely protect even the smallest raspberry from bruising or from being mixed up with other foods.

Side-by-Side concept

The side-by-side concept makes it possible to position fridges, freezers and wine cabinets to suit your needs. Special technology for controlling the environment between appliances with major temperature differences enables numerous combinations.
More information see page 26-27.

Ice cube tray with lid

The large ice cube tray is easy to fill with water thanks to its convenient fill opening. The lid seals on tightly so that the tray can be safely moved and placed in the appliance without spills.

Egg tray 2in1

Do you like chicken eggs? So does your Liebherr – that's why it has the 2in1 egg tray. This not only provides space for up to 20 chicken eggs, but also for up to 24 quail eggs. The egg tray consists of an outer and an inner part which can be slid into each other in different ways. By turning the tray over, the quail egg holes can be used.

The features shown are model specific; look for these features in your model choice.

Quality down to the finest detail

SmartSteel rear wall

The rear wall in elegant SmartSteel gives your Liebherr a stylish look and feel. Your food will also love SmartSteel as stainless steel is food-safe and hygienic. SmartSteel also reduces the visibility of fingerprints – making the appearance even more pleasing.

BioFresh

Crunchy salad and strawberries: the most delicate foods deserve a special place so they stay fresh longer – in BioFresh safes. In the Fruit & Vegetable safe the temperature is close to 0°C. Combined here with the constant humidity, thanks to the air-tight closure, unpackaged fruit and vegetables feel particularly at home. You do not have to adjust anything.

IceMaker with fixed water connection

Are there any ice cubes left? An IceMaker means you never have to ask. With the IceMaker with fixed water connection, the water comes directly from the tap. The MaxIce function allows you to produce up to 1.5 kg of ice cubes a day. The ice cube separator helps to divide the drawer into any size you want – for example, ice cubes on the left, ice cream on the right – or just for ice cubes.

LED side lighting on both sides

For a quick overview of everything in the refrigerator: thanks to the LED side lighting on both sides, your food is in view at all times.
The LEDs are positioned so that your large refrigerator is also illuminated with food inside it. And the LEDs integrated flush into the side walls mean that the valuable usable area is fully maintained.

NoFrost

When you open your freezer, you want to see frozen food – and certainly not ice and frost. NoFrost protects the freezer compartment from unwanted icing, which consumes a lot of energy and can be expensive. NoFrost means no more tedious and time-consuming defrosting of the freezer compartment, more time for other things – and saving money.

Versatile bottle shelf

The versatile bottle shelf is an innovative feature in all BioFresh Premium models. It can be positioned above or below the glass shelf to suit individual requirements.

The features shown are model specific; look for these features in your model choice.

Water				InfinitySpring

The standard features mentioned above may vary depending on the model. Details can be found in the model description.

Quality down to the finest detail

EasyFresh

The guarantee of market freshness in the home is our EasyFresh-Safe. Whether it's unpackaged vegetables or fruit, this ensures optimal storage for everything. Thanks to the air-tight closure, the food causes the humidity in the safe to rise. This keeps the food fresh for a long time.

BioFresh

BioFresh provides the perfect climate for long-lasting food storage. When stored at just over 0 °C and at the ideal humidity level, fruit, vegetables, meat and fish all retain their nutritious vitamins for longer.

PowerCooling

Do you want to be sure that the cold is distributed as evenly as possible in your refrigerator?
If so, the PowerCooling system is what you need. The fan – as powerful as it is quiet – distributes the cold air efficiently throughout the entire refrigeration compartment.

InfinitySpring

A source of fresh, cool drinking water in your kitchen. InfinitySpring sounds like something from a fairy tale. The water dispenser enables drip-free water dispensing and provides fresh, cold water. Simply press the panel with the carafe or glass, and enjoy the water. This enables you to save on purchasing bottles of water and to live more sustainably.

VarioSafe

Do you want a clearly arranged place for small food items such as yoghurt pots, jam jars or tubes? Your Liebherr provides this with the VarioSafe. It not only creates order, but is also highly adaptable. Simply place the two-stage height-adjustable VarioSafe in the refrigerator where it suits you best.

SoftTelescopic

Look forward to opening your BioFresh safes. And this is not just because of the fresh food – but also because opening is so easy, and closing is automatic and cushioned.
The telescopic rails slide the safe gently towards you. And because these extend fully, you have the best overview of the contents.

The features shown are model specific; look for these features in your model choice.

OpenStage drawers

Now there's a clear view of everything. The different heights of the drawers make it easy to store food of different sizes. In the bottom drawer, practical dividers ensure bottles are held securely in place. And, thanks to the transparent GlassLine drawers, you have a clear view of everything from bottom to top.

Side-by-side concept

The side-by-side concept makes it possible to position fridges, freezers and wine cabinets to suit your needs. Special technology for controlling the environment between appliances with major temperature differences enables numerous combinations.
More information see page 26-27.

Fruit & Vegetable safe

Crunchy salad and strawberries: the most delicate foods deserve a special place so they stay fresh longer – in BioFresh safes. In the Fruit & Vegetable safe the temperature is close to 0°C. Combined here with the constant humidity, thanks to the air-tight closure, unpackaged fruit and vegetables feel particularly at home. You do not have to adjust anything.

EasyFresh-Safe

The guarantee of market freshness in the home is our EasyFresh-Safe. Whether it's unpackaged vegetables or fruit, this ensures optimal storage for everything. Thanks to the air-tight closure, the food causes the humidity in the safe to rise. This keeps the food fresh for a long time.

SuperSilent

Shhh – listen carefully. Your Liebherr is so quiet that you have to strain your ears to hear it. How is this achieved? All refrigeration components such as compressors, valves, fans and evaporators are optimised and perfectly adapted to one another. This means you only hear what you want to hear in your kitchen.

Freezers

IG 1024

Quality down to the finest detail

NoFrost

When you open your freezer, you want to see frozen food – and certainly not ice and frost. NoFrost protects the freezer compartment from unwanted icing, which consumes a lot of energy and can be expensive. NoFrost means no more tedious and time-consuming defrosting of the freezer compartment, more time for other things – and saving money.

Side-by-Side concept

The side-by-side concept makes it possible to position fridges, freezers and wine cabinets to suit your needs. Special technology for controlling balancing the environment between appliances with major temperature differences enables numerous combinations.
More information see Page 26-27.

LED freezer compartment lighting

The LED freezer compartment lighting ensures your freezer drawers are pleasantly lit. This makes it even easier for you to find the food you want. The energy-efficient LED unit is elegantly positioned above the drawers to save space.

IceMaker

The plumbed-in automatic IceMaker keeps you topped up with high-quality ice cubes for every occasion.
Whether you need ice for a refreshing drink or a party with friends, with two drawers, the IceMaker holds all the ice cubes you'll need. Furthermore, it automatically keeps your supplies topped up and you can switch it off at any time.

Telescopic rails

The freezer drawers are mounted on high-quality, smooth-running telescopic rails for ease of use, even when heavily filled. The drawers offer ample storage space and have a single-piece design for easy removal and cleaning.

SoftSystem

The stylish SoftSystem mechanism is integrated into the door and matches the colour of the interior door; it conveniently cushions movement to ensure extremely soft closure even when the door shelves are fully stocked. The door closes automatically from an opening angle of about 30°.

The features shown are model specific; look for these features in your model choice.

- Freezing capacity in 24 h: 4 kg
- Safety glass fittings

Key features
- Ceiling heating for Side-by-Side concept
- Height-adjustable feet at front
- Right hand hinge, reversible

* In accordance with Regulation EU 2019/2016 we indicate the total volume to the nearest integer (rounded off) and the volume of the frozen compartments and refrigeration compartments to one place after the decimal point.

You can find the full range of efficiency classes on page 15. According to (EU) 2017/1369 6a.

MagicEye control

The elegant and precise MagicEye control with its visual temperature display lets you keep the temperature at exactly the level you select.
The clear arrangement of the function buttons makes for easy and convenient use.
The automatic **SuperFrost** function quickly reduces the temperature to freeze your food while preserving the vitamins.

SmartFrost technology

With the SmartFrost technology, ice build-up is greatly reduced. This makes defrosting rarely necessary. The interior walls of the freezer compartment are very smooth and easy-to-clean. Freezer drawers and glass shelves made of safety glass can be removed easily.

Under-worktop

UIKo 1560

Tray inserted into the base

The tray inserted into the base recess enables the optimal use of the lower space in the appliance. It can be easily removed and with a capacity of approx. 4 litres offers sufficient space for smaller goods.

Under-worktop refrigerator for integrated use

Deep shelves

A lot of goods can be stored on the deep shelves, reducing the need to bend down when storing and removing items. The items are delivered to the customer. This is a great ergonomic advantage, especially for under-worktop appliances that are installed below the table edge.

SuperSilent

Shhh – listen carefully. Your Liebherr is so quiet that you have to strain your ears to hear it. How is this achieved? All refrigeration components such as compressors, valves, fans and evaporators are optimised and perfectly adapted to one another. This means you only hear what you want to hear in your kitchen.

LiftUp Box

The LiftUp Box allows you to fully utilise the storage space below the pull-out drawer. It is ergonomically attached, easy to take out and can hold up to 4 kg. When pulled out, the LiftUp Box pushes up out of the base recess, allowing the food to be removed easily.

Pull-out glass shelves

Food is stored safely and easily accessible on the fully extendible pull-out glass shelves. The glass pull-out shelves made of safety glass are sturdy and easy to clean as well as being adjustable using practical rail dividers.

Wine cabinets

EWTdf 3553

An overview of our Wine cabinets

2 temperature zones

+5 °C to +20 °C

+5 °C to +20 °C

The **Vinidor range** offers maximum flexibility with two separately controlled temperature zones. The temperature of these can be set independently between +5 °C and +20 °C. This means that red and white wines can be stored at their ideal serving temperatures in the same cabinet. These cabinets not only provide the ideal climate conditions for long-term storage of wine, but with differently sized zones and fully adjustable temperature controls, they are suitable for every wine collection.

1 temperature zone

+20 °C

+5 °C

The GrandCru range storage cabinets offer similar conditions to a wine cellar. This range facilitates the storage of red and white wines at the correct long term storage temperatures or individual serving temperatures. The temperature can be adjusted from +5 °C to +20 °C as appropriate, and is both even and constant throughout the entire appliance interior.

Wine cabinets

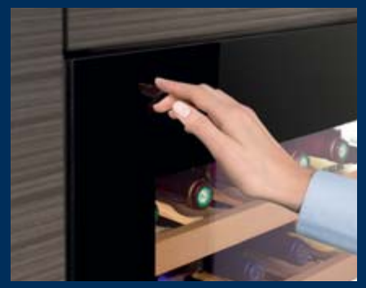
Quality down to the finest detail

Stainless steel frame

The high-quality, easy-to-fit stainless steel frame and handle enables all EWTdf models to be elegantly integrated into any kitchen. The robust stainless steel handle makes opening the door effortless. Available as an optional accessory kit for
EWTdf 3553 (9901573-00),
EWTdf 2353 (9901575-00),
EWdf 1653 (9901577-00)

SuperSilent

You've probably never heard of this Liebherr – simply because it is quieter than almost any other refrigerator. Its extra-low-noise design means it has virtually “unheard of” levels of quietness. Thanks to its maximum levels of noiselessness, it sets new standards even compared to the quietest refrigerators.



TipOpen

The handle-free glazed door guarantees perfect integration into a handle-free kitchen. Not only provides UV protection you can trust but also ensures superb visibility of the stored wines. The TipOpen technology opens the glazed door 7 cm when tapped and, if the door is not opened further within three seconds, the soft-closing system will shut it again.

Tinted isolation glass door

The handle-free glazed door guarantees perfect integration into a handle-free kitchen.
Not only provides UV protection you can trust but also ensures superb visibility of the stored wines.

LED lighting

All wine cabinets feature dimmable LED lighting, which evenly illuminates the interior and can be left on permanently if desired. Because LEDs generate minimal heat, wines can be sympathetically illuminated and beautifully presented for an extended period of time.

SoftSystem

The SoftSystem feature provides added safety and convenience. Integrated within the door, the SoftSystem cushions movement when the door is closed. This SoftSystem ensures that the door closes gently even when fully loaded inside. The door automatically closes from an angle of approximately 30°.

Presentation shelf

The presentation shelf is ideal for keeping open bottles at the perfect temperature and without the risk of spills.

FreshAir activated

The integrated FreshAir activated charcoal filter purifies the internal air and traps unpleasant odours. It is easy to replace and guarantees optimum air quality.

The electronic LCD display offers clear menu navigation and a Touch-electronic control system provides bespoke storage conditions. The digital temperature display can be read from the outside of appliances with glass doors. The Touch-electronic navigation ensures easy selection and use of the numerous control functions. The Vinidor 2 and 3 zone models feature an integrated door seal in the dividing shelf to maintain correct individual temperatures.

Telescopic rails

The Vinidor appliances are equipped with solid wooden shelves mounted on telescopic rails. The handcrafted shelves made from untreated wood are ideal for storing Bordeaux bottles safely, providing a clear view and easy access.

Clip-on labelling

The clip-on labelling system provides a quick and clear overview of your wine store.

Accessories drawer

The easy-glide accessories drawer can be used to store accessories directly below wine storage cabinets in the WKE 5 model range.
This increases the 45 cm recess to a 60 cm one.
Available in white glass (9901086-00), black glass (9901085-00) and stainless steel (9901084-00).

The features shown are model specific; look for these features in your model choice

EWTdf 3553 with stainless steel frame /- handle (Accessories)

Stainless steel frame and handle

The high-quality, easy-to-fit stainless steel frame and handle enables all EWTdf models to be elegantly integrated into any kitchen. The robust stainless steel handle makes opening the door effortless. Available as an optional accessory kit for EWTdf 3553 (9901573-00), EWTdf 2353 (9901575-00), EWdf 1653 (9901577-00)

Energy consumption per year / 24 h:	**151 / 0.413 kWh**
Max. Bordeaux bottles 0.75 l:	**33**
Total volume*:	**104 l**
Noise output / Sound power level:	**32 dB(A) / B, SuperSilent**
Climate rating:	**SN (from +10 °C to +32 °C)**
Black insulated glass door, handle and frame-free	
Aperture dimensions in cm (h/w/d):	**87.4-89 / 56-57 / at least 55.0**

Super Silent · Soft System · LED · Wine · Tip Open · Telescopic Rails

Controls
- LC-Display, touch electronics
- Digital temperature display for both wine zones
- Alarm in case of malfunction: visual and acoustic
- Audible door alarm
- Child lock function

Wine compartment
- 2 temperature zone, can be regulated between +5 °C and +20 °C
- 2 adjustable refrigeration circuits
- Convection cooling, FreshAir active carbon filter
- Humidity regulation via controllable ventilation
- LED Interior lighting with on/off function, dimmable
- Beechwood shelves
- 4 Shelves, of which 2 on telescopic rails, of which 1 is a presentation shelf

Key features
- TipOpen
- Height-adjustable feet at front
- Right hand hinge, reversible
- Replaceable door seal
- Concealed hinge with restricted opening

* In accordance with Regulation EU 2019/2016 we indicate the total volume to the nearest integer (rounded off) and the volume of the frozen compartments and refrigeration compartments to one place after the decimal point.

You can find the full range of efficiency classes on page 15.
According to (EU) 2017/1369 6a.

These models are only bound for storing wine. Maximum DIN norm bordeaux bottles capacity (0.75 l) as per norm NF H 35-124 (H: 300.5 mm, Ø 76.1 mm)

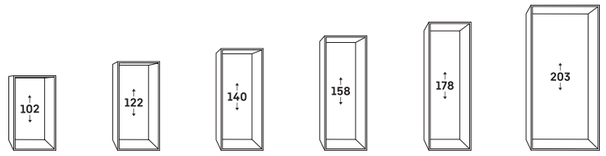
Aperture dimensions

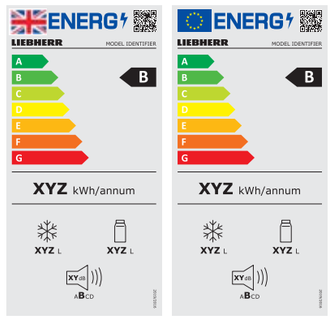
The dimensions for fully integrated appliances are industry standard.
The aperture dimensions provide information about the appliance size or height.
The exact dimensions of each appliance can be seen in the installation diagrams on the pages that follow.



SN	**from** +10 °C to +32 °C
ST	**from** +16 °C to +38 °C
N	**from** +16 °C to +32 °C
T	**from** +16 °C to +43 °C

Climate class

The climate rating specifies the ambient temperature for which the appliances are guaranteed to work normally.
The following climate ratings have been defined (pursuant to DIN EN ISO 15502):



Outstanding energy efficiency

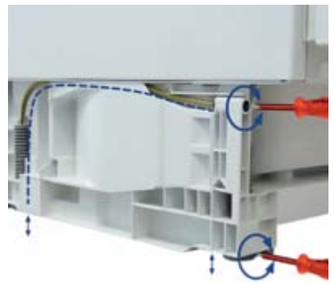
By combining state-of-the-art, precision electronics and highly efficient refrigeration systems, Liebherr offers an attractive and ultra-economical range of appliances in the best energy efficiency classes across all product groups. Liebherr offers products with the greatest possible energy savings. You can find the full range of efficiency classes on page 15. According to (EU) 2017/1369 6a.

Four-point attachment

So that our fully integrated fridges can be installed correctly, we provide special four-point fixing as standard for all our door-on-door appliances. The fixing points are attractively concealed with covers and the attachment brackets create a depth stop at the top and bottom. This alignment device ensures that the appliance is correctly positioned within the kitchen unit. Taller appliances with a height of 140 cm or more also come with two height-adjustable positioning feet at the front.

Vario plinth

The Vario plinth makes it possible to adapt under-worktop models (UIK, SUIG, UWT and UWK) to the height and depth of the kitchen units. All four positioning feet can be adjusted by up to 50 mm from the front. The position of the ventilation grille can also be adjusted to match the front of the kitchen units; it can be moved by up to 55 mm.



Levelling bars

Taller appliances with a height of 140 cm or more have two levelling bars on the left and right of the base. These make it possible to correctly level position the appliance and thereby ensure that the door closes correctly so that the appliance works properly.

Front air intake and ventilation

To ensure that the refrigeration system is cooled and the appliance operates correctly, fully integrated appliances must be adequately ventilated. Depending on the model and the installation location:

1 – Fully integrated appliances in non-ceiling height kitchen units.
Front air intake in the plinth, venting via the back wall of the kitchen unit.
2 – Fully integrated appliances in ceiling height kitchen units.
Front air intake in the plinth, venting via ventilation slots at the top.
3 – In the case of individual fully integrated appliances installed one above the other (Freshness Centre/SBS Concept, see pages 26/27) ventilation takes place as described in 1 and 2.
4 – Fully integrated appliances with both air intake and venting at the front.
5 – Under-worktop appliances with front air intake in the plinth.
Venting via ventilation slots at the top.
6 – Under-worktop appliances with both air intake and venting at the front.

Please note: All ventilation slots must be at least 200 cm^2.
