Awards

We are honoured to convey that we have been awarded Product of the Year - for two refrigerators - by those who matter to us most, our consumers. We thank them for their vote of confidence and assure them of our continued quest for excellence.

Winner Refrigerator Category. Survey of over 2800 people by Nielsen.
Global Success: The Liebherr Group

Liebherr is a third-generation, family-owned company founded by Hans Liebherr in 1949 with the creation of the first-ever tower crane. With over 70 years of success, Liebherr has become synonymous with equipment needed to build homes and businesses as well as the appliances within them. Regarded as one of the world’s largest manufacturers of construction machinery, Liebherr has expanded to eleven divisions with a wide array of product ranges, including earthmoving, mining, mobile cranes, tower cranes, concrete technology, maritime cranes, hotels, components, aerospace and transportation systems, gear technology and automation systems and domestic appliances. The company currently employs over 46,000 people in more than 130 companies in over 50 countries worldwide. Liebherr Appliances is Europe’s largest privately-owned manufacturer of fridges and freezers for residential and commercial use, with an annual production of more than 2.1 million units.
Keeping in mind the unique refrigeration needs of India, our European designs have been repurposed to blend harmoniously into Indian kitchens and living spaces.

Characterised by timeless, yet modern, elegant designs, Liebherr fridges surpass the highest aesthetic demands, with stunning exteriors and practical interiors.

Innovative designs have always been at the heart of Liebherr so intrinsically that many standard features today were actually introduced by Liebherr.

Liebherr fridges and freezers are fitted with cutting-edge LED lighting, which have great longevity, are energy-efficient and generate minimal heat, which aid longer food preservation.

For over 60 years, Liebherr has manufactured premium, high-quality, innovative fridges and freezers, consistently implementing new ideas as well as improved technologies.

Every single Liebherr appliance goes through a comprehensive inspection process to ensure quality workmanship benchmarking.

Lieberherr offers a wide range of professional appliances for commercial use. Here, as well, the most stringent manufacturing processes ensure food safety and freshness.

The elegant, high-quality materials used provide a premium ‘touch-feel’, along with durability. The outer body and door is fingerprint resistant and easy to clean and maintain.

Over the last 60 years, whenever we have come up with a feature or an idea, it often has been proved to be an innovation in the field. Which is why we now have countless patents to our name - and counting.

Innovative ideas have always been at the heart of Liebherr so intrinsically that many standard features today were actually introduced by Liebherr.

Lieberherr refrigerators all have modern speed-controlled 8-Step Inverter Compressor to enable optimum energy efficiency and minimal noise.

Energy efficiency is integral to our design. In fact, we have created an Inverter Technology Compressor that helps to achieve an impressive up to 4-Star ** BEE ENERGY rating.

Catering to the unique refrigeration needs of India, Liebherr designs have been repurposed to seamlessly blend into Indian kitchens and living spaces.

Designed for The Indian Kitchen Space

For Daily Use

Even Greater Freshness

Proven Quality

Every single Liebherr appliance goes through a comprehensive inspection process to ensure quality workmanship benchmarking.

Every component is thoroughly tested to last at least 1.5 years, including ‘minor’ parts, such as a door hinge.

Over the last 60 years, Liebherr has manufactured premium, high-quality, innovative fridges and freezers, consistently implementing new ideas as well as improved technologies.

Professional Quality

Lieberherr offers a wide range of professional appliances for commercial use. Here, as well, the most stringent manufacturing processes ensure food safety and freshness.

Visible Quality

The elegant, high-quality materials used provide a premium ‘touch-feel’, along with durability. The outer body and door is fingerprint resistant and easy to clean and maintain.

Visible Quality

The elegant, high-quality materials used provide a premium ‘touch-feel’, along with durability. The outer body and door is fingerprint resistant and easy to clean and maintain.

Liebherr also offers a wide range of professional appliances for commercial use. Here, as well, the most stringent manufacturing processes ensure food safety and freshness.

Even Greater Freshness

Innovatively designed vegetable drawers, with smart cooling and sealing systems, for example, ensure minimum loss of moisture, keeping these food items market-fresh.

Energy efficiency is integral to our design. In fact, we have created an Inverter Technology Compressor that helps to achieve an impressive up to 4-Star ** BEE ENERGY rating.

Perfecting Preservation
Since 1954

A food lover like you needs appliance makers who are equally passionate about food. Which is why Liebherr refrigerators help you preserve food at temperatures appropriate for refrigerating them. After all, we know that you will never compromise on the preservation of the food you love.
The Benchmark In Freshness

The unique DuoCooling technology from the house of Liebherr keeps the moisture in food locked in, ensuring it stays fresh for longer. This is because it cools the freezer and fridge sections separately and independently, maintaining temperature and humidity with incredible accuracy.

DuoCooling Technology

Benefits Of DuoCooling Technology

- Two separate Cooling Circuits
- Prevents loss of moisture
- Higher temperature accuracy
- No odour transfer
- Temperature can be independently controlled
Liebherr’s NoFrost appliances provide expert refrigeration technology to ensure long-term freshness. The food is frozen with chilled recirculating air and humidity, if any, is expelled. As a result, the freezer is always free of ice and food no longer frosts over. NoFrost convenience makes defrosting a thing of the past.

Our appliances fall into the highest efficiency classes. The double door Frost-Free range features an Inverter Technology Compressor and achieves an impressive up to 3-Star* BEE ENERGY rating, while the single door Direct Cool range is rated with up to 4-Star** BEE ENERGY rating.

NextGen 8-Step Inverter Compressor
The 8-step speed-controlled compressor, with highly advanced sensors, guarantees operational and efficient precision cooling. The electronic technology selects and maintains the speed of the compressor as per cooling demand, thereby optimising energy consumption.

SuperCool temporarily sets the fridge compartment to maximum cooling performance (approx. +2°C) for 12, 9, 6 or 3 hours. It's ideal for quickly chilling freshly-stored food.

The automatic SuperFrost function makes freezing simple and saves energy. As soon as the freezer compartment freezes, the SuperFrost function switches back to the normal mode after 65 hours (maximum) and assists in saving electricity.

NextGen 8-Step Inverter Compressor
The 8-step speed-controlled compressor, with highly advanced sensors, guarantees operational and efficient precision cooling. The electronic technology selects and maintains the speed of the compressor as per cooling demand, thereby optimising energy consumption.

Features
Food Will Fall
In Love With

Spice Boxes
Crafted specially for India, the Spice Boxes come with an easy grip and airtight silicon-locking seal. These boxes maintain freshness, minimise loss of aroma & flavour, and prevent them from mixing with other food items.

Solution for preservation of spices

Vegetable Sorting System
The uniquely designed sorting system offers flexible spaces for storing leafy vegetables and hard vegetables separately, without any worry of them mixing up.

Sorts your vegetables for ease of storage and removal

VarioSafe Compartment
The VarioSafe drawer is a smart solution for storing small items, such as pouches, delicate food items, or items that need to be stored separately.

Convenient storage solution for small objects

The above features and accessories may vary from model to model. Images for representation purpose only.
With FrostSafe, the extra-high and removable drawers are closed all around. This means that the cold cannot dissipate too quickly when the appliance is opened. The transparent front of the compartments guarantees an optimum overview of the frozen items.

Keep cool air intact inside drawers.

Flintbox

This super sleek box is convenient for storage and retaining freshness. It has an easy-to-open design and fits anywhere on the shelf.

Takes gentle care of sensitive, nutrient-heavy foods, such as dry fruits.

Door Handle

With Integrated Opening Mechanism

The practical door handle ensures smooth and effortless opening even if the refrigerator is opened repeatedly in quick succession. Thanks to its unique mechanism that pushes against the refrigerator housing.

For effortless & smooth door opening.

Cool Pack

Allows the freezer to maintain a lower temperature for a longer period, especially during a power failure. It can also be used externally to cool beverages or food items.*

Allows your freezer to stay cold.

*Amount and duration of cooling will vary depending on ambient temperature and temperature of stored items.

Liebherr’s new TDCs 4740 and TDCs 3540 refrigerators, with DuoCooling technology, help you preserve food with precision. Ordinary double door refrigerators come with a single cooling circuit which may result in unstable cooling and a loss of moisture. This results in food drying out and losing its freshness. Instead, DuoCooling technology provides independent cooling circuits that give you greater control over the temperature, while keeping food fresher, for longer.

The above features and accessories may vary from model to model. Images for representation purpose only.

Frost-Free

In a land where food is all about togetherness and freshness, it is not only essential to buy fresh ingredients, but also to store them in the most effective way. Moreover, the larger the family, the greater the requirement for the storage of fresh leafy vegetables, herbs and perishable foodstuff. The Frost-Free 346L provides a simplified solution to the refrigeration concerns of a large family.
